Dear Mr Summers,

Re: Category 1 and Category 2 – Shell Energy Pipelines– exemptions under Part 23 of the National Gas Rules (NGR)

As you would be aware, the pipelines (stated below) managed by Shell Energy hold Category 1 and Category 2 exemptions granted by the AER under Part 23 of the NGR.

Pipeline	Application Date	Expiry Date	Description
E04 Gas Pipeline	26 February 2019	1 March 2024	No third-party access pipeline.
E01	10 October 2022	26 February 2028	No third-party access pipeline.
E02	10 October 2022	26 February 2028	No third-party access pipeline.
E06	10 October 2022	26 February 2028	No third-party access pipeline.
E07	10 October 2022	26 February 2028	No third-party access pipeline.

Gas pipeline regulation reforms to the National Gas Law (NGL) and NGR were proclaimed in March 2023 and are now in effect.¹ Rule 12 of Schedule 6 of the NGR describes how a holder of a Category 2 exemption under Part 23 (which has now been repealed) will be taken to have been granted an exemption under the new Part 10 of the NGR.

We are therefore writing to inform you about the gas pipeline regulation reforms, how Shell Energy's pipelines may be affected by these changes and the application process for new exemptions under Part 10 of the NGR.

Existing Exemptions

Based on the information provided by Shell Energy in your Part 23 exemption applications, we have identified that the following exemptions granted in respect of the pipelines may be affected by recent changes to Part 10 and Part 23 (now repealed) of the NGR:

¹ The gas pipeline regulation reforms are contained in the *Statutes Amendment (National Energy Laws) (Gas Pipelines) Act 2022 (SA)* which came into operation on 2 March 2023, and the *National Gas Rules (Gas Pipelines) Amendment Rules 2023 (SA)* which was gazetted on 16 March 2023 and are consolidated into version 68 of the NGR.

Category 1 exemption:

- There are no provisions for former Part 23 Category 1 exemptions to be transitioned to the new Part 10.
- Category 1 exemptions therefore ceased to have effect from 16 March 2023.

Category 2 exemption (based on no third-party access):

Under rule 12 of Schedule 6 of the NGR, the holder of a Category 2 exemption granted under Part 23 of the NGR (as in force immediately before 2 March 2023²) in relation to a pipeline that is not a third-party pipeline, will be taken to have been granted a Category 1 exemption under Part 10 Division 2 Subdivision 2 of the NGR (as in force after 2 March 2023).

- This means that under the new rules, exempt pipelines are not obligated to publish all information under Subdivision 1 of Part 10 in relation to the pipeline.
- Service providers under Part 10 Category 1 exemptions are exempt from the requirement to publish a user access guide³ but must prepare and maintain a user access guide.
- Service providers under Part 10 Category 1 exemptions are also exempt from ss 139, 140, 141, 147 and 148 of the NGL (per NGR rule 35).

Information we require from Shell Energy

Please confirm whether there have been any changes to the information provided to the AER in your NGR Part 23 exemption application for the pipelines (for your reference, the information provided in your Part 23 exemption applications is included in Attachment 1).

Applications for new exemptions

Going forward, **applications for new exemptions must be made under the new Part 10** of the NGR which contains some key differences to the former Part 23. Should you wish to apply for a new Category 1 exemption under Part 10 upon expiry of your existing exemptions, we require that new application forms be completed separately and submitted to us.

Information about the [exemption process under Part 10](#) and the [application form](#) is available on the AER website. If you have any questions in relation to this exemption process, please contact [REDACTED].

Yours sincerely

Sent by email on: 19.12.2023

Attachment 1 Part 23 exemption application data

² 'Commencement day' for Schedule 6 of the NGR means the day on which Part 19 of Schedule 3 of the NGL (inserted into the NGL by the National Energy Laws Amendment (Gas Pipelines) Act 2022) comes into operation. That day was 2 March 2023.

³ NGR, r. 105C(8) of Part 11.
