Melbourne VIC 3000
Australia

Dear Clare

I am writing regarding Ausgrid's revised contingent project application to build a new sub-transmission substation at Macquarie Park, submitted to the Australian Energy Regulator (**AER**) on 31 October 2025 (**Wallumatta sub transmission Substation**).

We have decided to withdraw our revised application with a view to resubmitting a second revised application early in the new year. Ausgrid remains committed to delivering this project to connect the customers in this area within the required timeframe. Our second revised application will address matters recently discussed with the AER.

Ausgrid looks forward to engaging with the AER on our revised application in the near future.

Regards,

Marc England
Chief Executive Officer
