Dear Douw de Kock

**Re: Notice of Acceptance of eligibility to register network exemption – Ingleburn Logistics Park Warehouse 3**

I refer to the application of Stockland Trust Management Limited (ABN 86 001 900 741) and The Trustee for Energy Bay Oscar Fund (ABN 86 236 720 454) (the Applicants) for eligibility to register network exemptions under the requirements of Appendix C of the Network Exemptions Guideline to create an embedded network at Ingleburn Logistics Park, Warehouse 3, 35-47 Stennett Road, Ingleburn NSW 2565 (the Site).

We issue this Notice of Acceptance effective from 12 November 2025 and confirm that the Applicants are now eligible to register the relevant network exemptions for publication on the AER's public register of exemptions.

***Eligibility for exemption in relation to conversions of existing networks***

In accordance with Condition 1.12.1(e) of the Network Exemptions Guideline (Guideline), an embedded network must not be created without the written consent of existing energy consumers who will be included within the proposed network.

In addition, the Guideline stipulates that a network must not be converted until the effective date specified in this notice.

Parties who are issued with a Notice of Acceptance are eligible to register and hold network exemptions for the network at that particular site according to the appropriate activity class. Activity classes and their applicable conditions are detailed under Appendix A-1 of the Guideline. The detailed conditions are set out in Appendix A-2.

Failure to observe the conditions of exemption may render an exemption invalid. Owning, controlling or operating a network without registration with the Australian Energy Market Operator (AEMO) or holding a valid exemption from the AER constitutes a breach of section 11(2) of the National Electricity Law.

***Additional conditions applicable to the network exemption class(es) registered***

In addition to the conditions usually applicable to the network exemption class(es) held in relation to the embedded network at this site, the Applicants must also comply with the conditions relating to sites converted into an embedded network. These conditions concern:

- retain consent records for a period of at least 2 years from the date of the application
- facilitating the continuation of a customer's energy contract with their current retailer
- maintaining a customer's direct connection to the registered distributor
- offer matching
- avoidance of duplicated network charges
- liability of the costs of metering/network changes
- the ability of metering arrangements to allow for access to retail competition.

For the full list of conditions refer to the [Guideline](#).

If you have any further queries, or would like to discuss this further, please contact Ethan Chung on [REDACTED]

Yours sincerely
