

26 June 2026

Clare Savage
Chair
Australian Energy Regulator

By Email: [REDACTED]

Dear Ms Savage,

Project EnergyConnect

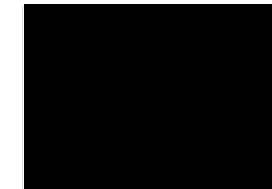

Thank you for your follow up letter of 11 June 2026 asking if AEMO has any further views on the expected adverse consequences on the reliability and security of the transmission system in New South Wales and/or South Australia if Project EnergyConnect (PEC) is materially delayed or not built.

As AEMO has not undertaken reliability or security analysis on a scenario where PEC is materially delayed or not built, it does not have further views to provide in response to this request.

Should you have further questions please contact Violette Mouchaileh at

[REDACTED] or on [REDACTED]

Yours sincerely,

Daniel Westerman
Chief Executive Officer
