- 5.2 *AER Portal User* accounts may be updated as required by contacting the AER at ContractMarketMonitoring@aer.gov.au.
- 5.3 This *Order* requires *Class Members* to submit the information and agreements required by Data Categories 01, 02 and 03 in Appendix A via the *AER Portal*, using the following link provided by the AER: <https://portal.aer.gov.au/>.
- 5.4 Information and agreements required by Appendix A must be submitted against the relevant data category in the *AER Portal*.

 - are not required to make a duplicate submission via the *AER Portal*.
- 5.6 Subject to AER written approval and direction, the information and agreements required by this *Order* may be submitted via another method.

6 Reasons for making this Order

- 6.1 In accordance with section 30AL of the *NGL*, the AER considers it is reasonably necessary for the performance of its functions under Division 1AA of the *NGL* to make this *Order*. The functions relevant to this *Order* include, but are not limited to:
- Regularly and systematically monitoring and reviewing the performance of the wholesale gas markets.
 - Identifying and analysing whether there is effective competition and efficient functioning in relation to the wholesale gas markets.
 - Identifying and analysing whether there are features of one or more wholesale gas markets that may be impacting detrimentally on the achievement of the *National Gas Objective*.
 - Other monitoring or analysing functions, conferred on the AER by the *NGR*, relating to offers and prices, including forecasts and actual prices and bidding, within the wholesale gas markets.
 - Preparing, at least once every two years, a report on the results of the performance of the AER wholesale market monitoring functions. This report must

include a discussion and analysis of the matters outlined in section 30AC(3) of the *NGL*.

- Providing advice, as the *AER* thinks fit, on the results of the performance of these functions to the Energy and Climate Change Ministerial Council.

6.2 The *AER* further considers that this enhanced market monitoring and reporting will contribute to the achievement of the *National Gas Objective* by increasing transparency and enhancing advice to policy makers regarding the efficient operation and use of covered gas services for the long-term interests of consumers.

6.3 Market participants need to be able to move and store gas to effectively participate in the wholesale gas market. Service providers subject to the publishing requirements in Division 2 of Part 10 of the *NGR* and/or service providers of a Part 18A facility have obligations to publish actual prices payable information online.

Data Category 01 and Data Category 02

6.4 The *AER* requires the *Counterparty* names for the information that has been published under Part 10, rule 101E and Part 18A, rule 198E(1)(b) of the *NGR*. This information will allow the *AER* to understand wholesale gas market participants' access to transport and storage, and on what terms.

6.5 This information is required to enable the *AER* to assess market concentration, market participant behaviour and market power in domestic wholesale gas markets. It will allow the *AER* to evaluate whether market conditions are enabling effective competition, and monitor whether access to transport, compression and storage infrastructure is creating barriers to entry for market participants.

Data Category 03

6.6 The actual prices payable information published on a *Class Member's* website under Part 10 and/or Part 18A of the *NGR* only indicates whether a contract uses standard or non-standard terms – it does not include any detail on those terms and conditions. Terms and conditions, which are only available within the *Contracts and/or Agreements*, including pricing terms and other contractual rights, and are important to fully understand the characteristics of the service market participants are receiving.

6.7 Contract terms and conditions may operate as barriers to obtaining pipeline capacity in ways that can have a significant impact on competition in relevant wholesale gas markets. For example, terms related to exclusivity or other preferential arrangements can serve as a barrier to other market participants accessing transport, compression or storage services. The *AER* therefore requires access to the *Contracts and/or Agreements* to appropriately examine how these terms and conditions restrict the availability of pipeline capacity.

6.8 For these reasons, the detailed terms and conditions are required to enable the *AER*, to assess market concentration and market power in different regions, evaluate whether market conditions are enabling effective competition, and monitor where access to transport, compression and storage infrastructure create critical barriers to entry or participation for market participants.

Data Category 04

- 6.9 The AER requires the terms and conditions of *Contracts and/or Agreements* from the *Exempt Part 10 Class* for the reasons outlined in sections 6.7 and 6.8.

Consideration of alternate sources

- 6.10 The AER has considered whether it is able to obtain the information and agreements required under this *Order* in another way and, where possible, has attempted to minimise the burden placed on *Class Members* providing the information and agreements. The information and agreements required under this *Order* is held only by *Class Members* and the *Counterparties* and is not publicly available. As such, the AER requires this information and agreements to be provided by *Class Members*.

Maintenance Requirements

- 6.11 The AER requires *Class Members* to maintain and keep all information and agreements provided in response to, and relied on to prepare the responses required, under this *Order* in accordance with section 3 of this *Order*.
- 6.12 This is required for the appropriate audit and monitoring of compliance with this *Order* to ensure information and agreements used by the AER for its monitoring functions is complete and accurate.
- 6.13 A maintenance period of 6 years from the provision of the information and agreements for submissions in accordance with section 4 of this *Order* is required due to the long-term view of the market which the AER is required to take.

7 Assurance requirements

- 7.1 The *Order* requires an *Authorised Officer* of a *Class Member* to attest to the completeness and quality of the information and agreements provided to the AER in response to this *Order*.
- 7.2 Where a consolidated response is submitted to the AER in accordance with section 3.7 of this *Order*, an *Authorised Officer* of the *Class Member* making the submission must attest to the completeness and quality of the information and agreements provided to the AER in response to this *Order* on behalf of all *Class Members* included in the consolidated response.
- 7.3 This assurance is to be submitted to the AER using the submission method required under section 5 of this *Order* alongside any information and agreements provided in response to this *Order*.
- a) Using the proforma in:
 - i. Appendix B if submitting in accordance with section 3.7 of this *Order*;
 - ii. Appendix C; or
 - iii. Appendix D if submitting in accordance with section 3.10 of this *Order*.

This report and all attachments have been prepared by *[Class Member]* with all due care and skill and in accordance with MMIO-GAS-2026-01.”

or

c) Via an alternate method agreed by the *AER*.

7.4 A *Class Member* may contact the *AER* in writing to request an alternate method of assurance.

Subject to written *AER* approval, the information and agreements may be submitted via another method.

The *AER* will consider exemption applications on a case-by-case basis.

- a) a change in the applicant's name to which the exemption applies; or
