1. Introduction

Negotiated transmission services are a class of service defined in Chapter 10 of the National Electricity Rules (NER). They broadly include services provided in relation to generation or direct connect customer connection to the shared transmission network. The NER require negotiated transmission services be provided on terms and conditions that are negotiated between the TNSP and the service applicant.

Victoria operates under a different negotiating framework to other jurisdictions in the NEM. This reflects that VicGrid and AusNet Services both have responsibilities to provide transmission services in Victoria. A service applicant seeking a negotiated transmission service may need to engage with either VicGrid and/or AusNet Services, depending on the type of service sought.

The negotiating framework approach contained in version 109 of the NER applies in Victoria. Clause 6A.9.5 of version 109 of the Rules requires a Transmission Network Service Provider to prepare a negotiating framework setting out the procedure to be followed during negotiations with any person who wishes to receive a negotiated transmission service from the Transmission Network Service Provider, as to the terms and conditions of access for the provision of the service. The negotiating framework must comply with and be consistent with:

- the applicable requirements of a transmission determination applying to the Transmission Network Service Provider; and
- the minimum requirements for a negotiating framework, which are set out in clause 6A.9.5(c) of the Rules.

This document is the negotiating framework applicable to AusNet Services only. This negotiating framework applies to AusNet Services for the period 1 April 2027 to 31 March 2032. AusNet Services is the TNSP who owns and operates the majority of the Victorian Transmission Network. AusNet Services provides and offers *connection services* to *Network Users* in respect of those parts of the Victorian Transmission Network it owns and operates.

VicGrid provide *shared transmission services* to users of the Victorian Transmission Network. Any application to connect to the Victorian Transmission Network may require the *Service Applicant* to enter into agreements with VicGrid. Additional agreements are required if an *augmentation* of the network is required to facilitate the connection, consistent with section 50F of the *National Electricity Law* and rule 8.11 of the *Rules*.

2. Definitions

Terms appearing in *italics* in this document are defined in the *Rules*. Additional defined terms and abbreviations used in this document are listed below:

Business Day means a day that is not:

- (a) a Saturday or Sunday; or
- (b) observed as a public holiday in Melbourne, Victoria.

Negotiating Party has the meaning given in section 3 of this *negotiating framework*.

AusNet Services means AusNet Transmission Group Pty Ltd (ABN 78 079 798 173).

TNSP means *Transmission Network Service Provider*.

Victorian Transmission Network means the declared transmission system as defined in section 33 of the *National Electricity (Victoria) Act 2005* (Vic).

A **negotiated transmission service** is consistent with the definition in v109 of the NER as any of the following services:

- (a) a shared transmission service that:
 - (1) exceeds the network performance requirements (whether as to quality or quantity, if any) as that shared transmission service is required to meet under any jurisdictional electricity legislation; or
 - (2) except to the extent that the network performance requirements which that shared transmission service is required to meet are prescribed under any jurisdictional electricity legislation, exceeds or does not meet the network performance requirements (whether as to quality or quantity) as are set out in schedule 5.1a or 5.1;
- (b) connection services that are provided to serve a Transmission Network User, or group of Transmission Network Users, at a single transmission network connection point, other than connection services that are provided by one Network Service Provider to another Network Service Provider to connect their networks where neither of the Network Service Providers is a Market Network Service Provider; or

- (c) use of system services provided to a Transmission Network User and referred to in rule 5.4A(f)(3) in relation to augmentations or extensions required to be undertaken on a transmission network as described in rule 5.4A, but does not include an above-standard system shared transmission service or a market network service.

3. Application of negotiating framework

This *negotiating framework* applies to AusNet Services and each *Service Applicant* who applies in writing to AusNet Services for the provision of *connection services* which are *negotiated transmission services* (each a **Negotiating Party** in respect of the relevant *negotiated transmission service*).

The Negotiating Parties must comply with the requirements of this *negotiating framework* in accordance with clause 6A.9.5(e).

The requirements set out in this *negotiating framework* are in addition to any requirements or obligations contained in Chapters 4, 5 and 6A and 8 of the *Rules*. In the event of any inconsistency between this *negotiating framework* and any other requirement of the *Rules*, the requirements of the *Rules* will prevail.

Nothing in this *negotiating framework* will be taken as imposing an obligation on AusNet Services to provide any service to the *Service Applicant*.

This *negotiating framework* is intended to be capable of adoption by other declared *transmission system operators* in respect of the *connection services* they provide in Victoria, subject to AER approval

4. Conduct of negotiations

Each Negotiating Party must negotiate in good faith the terms and conditions of access for the provision of the negotiated transmission service sought by the Service Applicant. AusNet will make best endeavours to make resources available for early engagement of a potential service applicant.

5. Timeframe for negotiations

Chapter 5 of the *Rules* provides the framework for connection to the Victorian Transmission Network. Applications for negotiated transmission services must be commenced, progressed and finalised in accordance with applicable timeframes and requirements set out in Chapter 5 of the *Rules*, unless otherwise agreed between the Negotiating Parties. The timeframes included in version 109 of the *Rules* are shown below. Where there is any inconsistency between the timeframes included in the negotiating framework and version 109 of the *Rules*, version 109 of the *Rules* will prevail.

Rule	Event	Indicative timeframe
5.3.3(b)	AusNet provides preliminary program to the <i>Connection Applicant</i>	Within 10 business days after receipt of the <i>connection enquiry</i> and all required information
5.3.3(c)	AusNet provides written advice of further information the <i>Connection Application</i> must prepare to enable the assessment of the <i>application to connect</i>	Within 20 business days after receipt of the <i>connection enquiry</i> and all required additional information
5.3.6(a)	AusNet makes an <i>offer to connect</i>	Where the <i>application to connect</i> was made under clause 5.3.4(a), the timeframe specified in the preliminary program
5.3.7(g)	AusNet and the <i>Registered Participant</i> jointly notify AEMO that a <i>connection agreement</i> has been entered into	Within 20 business days of execution of the <i>connection agreement</i>

The Negotiating Parties must use reasonable endeavours to adhere to the time periods referred to in this section, subject to section 12.

Notwithstanding any other provision of this *negotiating framework*, the timeframes referred to in this section:

- do not commence until payment of the application fee pursuant to section 6; and
- reset if there is a material change in the *negotiated transmission service* sought by the *Service Applicant*, unless AusNet Services agrees otherwise.

6. Costs of investigation and negotiation

Prior to commencing negotiations, the *Service Applicant* must pay an application fee to AusNet Services (as applicable), such amounts not being more than necessary to:

- cover the reasonable costs of AusNet Services (as applicable) anticipated to arise from investigating the application to connect and preparing the associated offer to connect; and
- meet the reasonable costs anticipated to be incurred by other Network Service Providers, to the extent that their participation in the assessment of the application to connect will be required.

AusNet will provide detailed cost breakdown of the reasonable costs to arise from the *application to connect*.

From time to time, AusNet Services may give the *Service Applicant* a notice setting out the reasonable costs it, or any other *Network Service Provider*, incurs. If the aggregate of the costs incurred exceed the application fee and any additional amount already paid by the *Service Applicant* under this section, the *Service Applicant* must pay such excess within 20 Business Days of receipt of an invoice.

AusNet Services may require the *Service Applicant* to enter into a binding agreement with it that addresses conditions, guarantees and other matters in relation to the costs of investigation and negotiation.

7. Charges for negotiated transmission services

The price (charges) for *negotiated transmission services* must be in accordance with the principles set out in clause 6A.9.1 of the *Rules*. Accordingly, an offer to *connect* will include charges which are “based on the costs incurred in providing that service, determined in accordance with the principles and policies set out in the *Cost Allocation Methodology*” (as per clause 6A.9.1(1)), and taking into account all other applicable *Negotiated Transmission Service Principles*. AusNet will provide detailed cost breakdown of the charge.

The Negotiating Parties may agree to an alternative scope of works and price through the negotiation process.

We also note that Negotiating Parties can also be charged for their cost share of shared prescribed connection assets such as shared connection transformers consistent with AusNet transmission's pricing methodology.

8. Provision of information

General commercial information

Each Negotiating Party agrees to provide to the other Negotiating Parties all such commercial information that may reasonably be required to enable those other Negotiating Parties to engage in effective negotiation for the provision of the relevant negotiated transmission service. The commercial information provided by AusNet Services will include a description of the nature of the negotiated transmission service, including details of what AusNet Services would provide as part of that service and the terms and conditions on which that service will be provided.

A Negotiating Party may give notice to another Negotiating Party requesting any additional commercial information that is reasonably required by the first Negotiating Party to enable it to engage in effective negotiations in relation to the provision of a *negotiated transmission service* or to clarify commercial information already provided.

A Negotiating Party who is requested to provide information under this section must use reasonable endeavours to do so within 10 Business Days of the request or as otherwise agreed by the parties.

Information about costs and charges

AusNet Services will identify and inform the *Service Applicant* of the reasonable costs, and/or the increase or decrease in costs (as appropriate), of providing a *negotiated transmission service* that is a *connection service*.

AusNet Services (as applicable) will demonstrate to the *Service Applicant*, upon request, that the charges for providing the relevant *negotiated transmission service* reflect those costs, and/or the cost increment or decrement (as appropriate).

9. Confidential information

Commercial information required to be provided by a Negotiating Party pursuant to this *negotiating framework* does not include:

- confidential information provided to that Negotiating Party by another person; or
- information that the Negotiating Party is prohibited by law from disclosing.

Commercial information may be provided by a Negotiating Party subject to a condition that the receiving party must not provide any part of that commercial information to any other person without the consent of the party disclosing the commercial information. A Negotiating Party may require another Negotiating Party to enter into a confidentiality agreement on terms reasonably acceptable to both parties.

In processing a connection enquiry and *application to connect*, AusNet Services may be required to consult with other affected *Network Service Providers*, *Transmission Network Users* and VicGrid under our joint planning obligations.

Having regard to these obligations the *Service Applicant* must, when providing information to AusNet Services, specifically identify in writing any information that is not to be disclosed for the purposes of those consultations.

Unless advised to the contrary, the *Service Applicant* is taken to consent to the disclosure of its commercial information for the purposes of consultation as outlined in this section.

10. Dispute resolution

All disputes as to the terms and conditions of access for the provision of a *negotiated transmission service* are to be dealt with in accordance with Part K of Chapter 6A of the Rules.

11. Other network users

In accordance with clause 6A.9.5(c)(8) of the *Rules*, AusNet Services will determine the potential impact on other *Transmission Network Users* of the provision of the relevant *negotiated transmission service*.

AusNet Services will notify and consult with any affected *Transmission Network Users* and ensure that the provision of the relevant *negotiated transmission service* does not result in non-compliance with any service standards or other obligations in relation to other *Transmission Network Users* under the *Rules* or a connection agreement.

12. Suspension of time periods

Any applicable timeframe for negotiation or provision of a *negotiated transmission service* as referred to in this *negotiating framework* may be suspended if:

- within 15 Business Days of AusNet Services providing the commercial information to the *Service Applicant* pursuant to section 8, the *Service Applicant* does not agree to a date for the undertaking and conclusion of commercial negotiations, until that date is agreed;
- a dispute in relation to the *negotiated transmission service* has been notified to the AER under clause 6A.30.1 of the *Rules*, from the date of notification of that dispute to the AER until the dispute is withdrawn, terminated or determined;
- within 10 Business Days of AusNet Services requesting additional commercial information from the *Service Applicant* pursuant to section 8, the *Service Applicant* has not supplied that commercial information, until the date the information is provided;
- without limiting the above, the *Service Applicant* does not promptly conform with any of its obligations as required by this *negotiating framework* or as otherwise agreed by the Negotiating Parties, until the date the obligations are complied with; or
- AusNet Services has been required to consult with any affected *Network Service Providers*, *Transmission Network Users* for the period reasonably allowed by AusNet Services for such consultation or until the receipt of any information required from that party for the purpose of providing the *negotiated transmission service*, whichever is later.

13. Termination of negotiations

The *Service Applicant* may elect not to continue with an application for a *negotiated transmission service* and may terminate the negotiations by giving the other Negotiating Parties written notice of its decision to do so.

AusNet Services may terminate a negotiation under this *negotiating framework* by giving the AusNet Services) and the *Service Applicant* written notice of its intention to do so where:

- it is of the reasonable opinion that the *Service Applicant* will not acquire the *negotiated transmission service*;
- it believes on reasonable grounds that the *Service Applicant* is not conducting the negotiations in good faith;
- the *Service Applicant* consistently fails to comply with the obligations in this *negotiating framework*;
- the *Service Applicant* fails to pay one or more of the amounts specified in section 6; or
- an event occurs in relation to the *Service Applicant* that would be a *default event* under any of clauses 3.15.21 (a)(7) to 3.15.21(a)(15) of the *Rules* (inclusive) if the *Service Applicant* were a *Market Participant*.
