

# The Australian Energy Regulator

**Public forum on  
AEMO transmission  
determination**

# Public forum

- Objective:
  - AEMO explains its regulatory proposal
- Stakeholder engagement:
  - Issues paper
  - Better Regulation

# AEMO

## transmission determination

- Pricing methodology
  - Answers the question: “who should pay how much” for transmissions services
- Negotiating framework
  - Establishes the procedures for negotiating the terms and conditions of access to negotiated transmission services
- Negotiated transmission service criteria (NSTC)

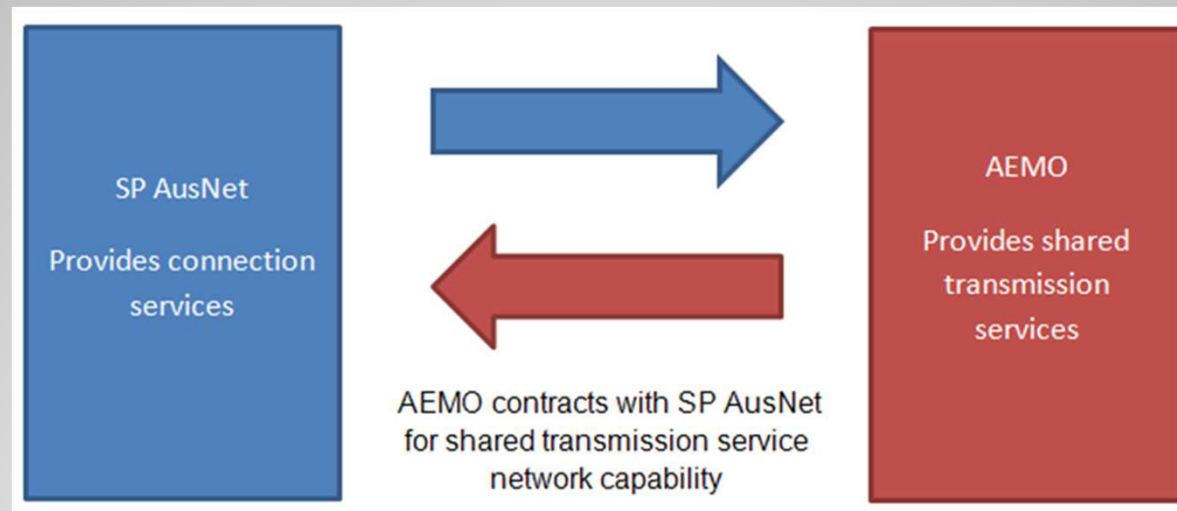

# The AER's role

- Assess:
  - The proposed pricing methodology against the NER and the AER's guidelines; and
  - The proposed negotiating framework against clause 6A.9.4(c)(1)-(9) of the NER.
- Develop:
  - The NTSC for AEMO in consultation with stakeholders

## Need for determination

- For the purposes of Chapter 6A of the NER, AEMO is considered to be a TNSP.
- The previous transmission determination for AEMO expires on 30 June 2014.
- The unique Victorian transmission arrangements...

# Victorian transmission arrangements
