Dear Mr Roberts,

RE: SAPN Regulatory Proposal 2015-2020

AGL would like to make a supplementary submission on the SAPN Regulatory Proposal, concerning the proposed Flexible Load Strategy.

AGL fully supports the adoption of the Flexible Load Strategy to better utilise and manage the controllable load potential within South Australia. In particular, AGL would encourage and support further work between SAPN and the AER on management of hot water load management in SA, given its impact on market outcomes to SA as a region, as well as the wider NEM.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Elizabeth Molyneux', is written over a faint, larger version of the signature.
