

Dear Sir / Madam

I am writing regarding the retail exemption application by South Stradbroke Utilities Pty Ltd. I own two properties that will be affected by this nonsensical application should it be allowed to proceed.

Still nobody seems to know who this organisation is. Who are they? What do they want exactly? The current operator has already charged us \$1.1M to run the plant til I think at least March 2021. All owners are already contributing to that and that is 100% of the operating cost and upkeep of the electrical facility that we the owners through the body corporate already own.

Previously I asked who they were and what experience they have in operating an electrical facility. You failed to reply to that query in the previous reply nor was it supplied in the original application! Has it been asked of the applicant since? I note that the company was only registered on 10 October 2019 so their experience cannot be too great. Please followup on this query and let us know what their response is as that would be very interesting indeed!

Then what right does this organisation have to just remove a meter that was paid for and is owned by our body corporate and paid for by us the owners and then charge us again for a new meter? This is all bordering on ridiculous! We have working meters already !

You need to give all of us a lot more information than what has already been provided as I feel like you must know a lot more than we do about this. We seem to being left in the dark regarding this application and there seems to be something very sinister regarding all of this.

Can you please advise what the appeal process is with this should all this proceed in the cloud of darkness as it appears to be heading already.

Yours sincerely

Anonymous Submitter
