Hi C-I-C,

My evaluators informed me that the adjustment has been fully completed this week. Let me know if you have any questions.

Thanks and regards

C-I-C

Hi C-I-C,

This is to let you know that our programmers are still working on the adjustment. I will let you know once it is released.

Regards,
C-I-C

Hi C-I-C,

Thank you for your patience on this matter. My evaluators informed me that they are still looking into it. Some adjustments will be made from tenor "6 years" and above. I will keep you posted.

Regards,
C-I-C

Thanks C-I-C – is that likely to be today? If not, would you mind copying in C-I-C [@ausnetservices.com.au](mailto:C-I-C@ausnetservices.com.au) and C-I-C [@ausnetservices.com.au](mailto:C-I-C@ausnetservices.com.au), as I'm heading off overseas tomorrow, so I won't be accessing my email.

Thanks

C-I-C

Hi C-I-C,

I will forward your query to my evaluators and come back to you as soon as I have an update from them.

Thanks and regards

Subject: Re:Question about BVAL Curves

Hi C-I-C,

I've been looking at the BVAL curve BVCSAB10 for 10-year BBB rated corporates and I am wanting to understand why the BVAL 10-year implied margin over the 10-year swap rate is 1.7% on 20th May, whereas Asciano issued at 2.15% over swap on 12th May. The BVAL 10 year corporate curve was only published again after the Asciano bond was issued, so I assume it is the dominate source of 10-year pricing.

I calculated the BVAL 10-year implied margin as (4.925% BVAL 10 year index – 3.22% 10-year Swap = 1.705% 10-year spread to swap)
