

Attachment 1 - Confidentiality template

Title, page and paragraph number of document containing the confidential information	Description of the confidential information.	Topic the confidential information relates to (e.g. capex, opex, the rate of return etc.)	Identify the recognised confidentiality category that the confidential information falls within.	Provide a brief explanation of why the confidential information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment would be caused from disclosing the confidential information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
<p>Revenue Proposal Page 83, Table 4.7 – final row</p> <p>Pages 312 (dot point in para 1), 313 (dot point in para 3), 317 (all) and 318 (first two paras and figure 12.1)</p>	<p>Related Party Margins</p> <p>Cost pass through event details</p>	<p>Capex</p> <p>Cost pass through</p>	<p>Market sensitive cost inputs</p> <p>Strategic information</p>	<p>This information can be used to derive details on current suppliers' contracts</p> <p>Disclosure of the details of this cost pass through event could jeopardise AusNet Services' ability to negotiate a fair and reasonable price.</p>	<p>Disclosure will effect both suppliers' market position and AusNet Services ability to obtain competitive prices in the future.</p> <p>If a fair price was unable to be negotiated, AusNet Services' revenue requirement would be higher than otherwise.</p>	<p>There are no related party margins contained in the capital expenditure forecast. Therefore disclosing the information will not affect stakeholders' assessments of the expenditure forecast.</p> <p>It is not in the long term interests of customers for prices to rise.</p>
<p>Appendix 1B - Related Party Arrangements</p>	<p>Commercial in confidence contract information</p>	<p>Capex and Opex</p>	<p>Market-Sensitive cost</p>	<p>This information contains details on current suppliers'</p>	<p>Disclosure will effect both supplier's market position</p>	<p>Little public benefit or consumer interest in supplier contracts</p>

Section 3 (pages 6-10) and Attachments			inputs	contracts	and AusNet Services ability to obtain competitive prices in the future.	details

	insurance policies (e.g. bushfire liability policy limit), as well as to current liability issues.			dealt with.	encourage claimants to increase their claims to the maximum amount covered by AusNet Services' policies.	
Appendix 5D – Proposed Operating Expenditure Step changes 2017 – 2022 p.7, section 3.1.1, paragraph 2	IT security information	Opex	Information affecting the security of the network	Providing potential hackers with information regarding AusNet Services' information security arrangements may affect its ability to maintain secure IT systems.	Provision of this information has the potential to compromise the security of the Victorian electricity transmission network.	AusNet Services is obligated to maintain the safety and security of supply. There is no public benefit from compromising security.
Appendix 7B – Network Capability Incentive Parameter Action Plan (NCIPAP)	This document lists every circuit and injection point	Incentive schemes.	Information affecting the security of the network	The comprehensive nature and level of detail provided in this data poses a security concern.	If this information is publically available it could facilitate individuals/ groups looking to	AusNet Services is obligated to maintain the safety and security of supply. There is no public benefit from compromising

Attachment 1 (Excel file) Whole document is Confidential	on AusNet Services' network.				compromise network security, including through physical attacks.	security.
Appendix 10I – Averaging period letter Dates in Attachment – Nominated Averaging Period (all tables on pages 2 and 3)	The information identifies the debt data averaging periods for use in determining the rate of return.	The rate of return.	Information affecting the security of the network and strategic information	The information identifies the businesses debt data averaging periods for all years of the 2017-22 regulatory period.	If the periods were publically disclosed, this is likely to compromise the business' ability to raise debt or hedge coverage within the averaging period on an efficient basis because other debt market participants would become aware that the business had an incentive to try and obtain a large quantity of debt or hedge coverage in that limited period.	The likely outcome of the information being made public is that the businesses costs would rise which would not be in the long term interests of consumers. Accordingly, the publication of the information does not provide any detriment to stakeholders in their ability to assess and understand the substance of all issues arising from the businesses information. Further, there is no public benefit to be gained from the disclosure of the information.
