Dear Chris,

Request for Fire start reports under clause 5 of the F-Factor Scheme Order 2011

Please find attached, AusNet Services' response to the Australian Energy Regulators' (AER) letter dated 27 August 2012, requesting the submission of fire start reports to the AER by 31 March for each year relating to the outcomes of the previous regulatory year.

The fire start report for AusNet Services for 2014 is set out in Attachment 1.

It should be noted that the information in these reports are currently under external audit as per the Fire Factor Regulatory Notice (RIN), due to the AER by 30 April 2015.

Should you have any queries in relation to this matter, please do not hesitate to contact Andrew Walsh on 9695 6470, or by email to andrew.walsh@ausnetservices.com.au.

Yours sincerely

AusNet Services' Fire Start Report for 2014

1. Background

In accordance with clause 5(1) of the F-Factor Scheme 2011 (the **Order**), the Australian Energy Regulator (**AER**) has requested the provision of the following fire start report. A fire start report is required to be provided to the AER by the 31 March of each year that contains a summary of network related fire incidents, as defined in the Order, for the previous regulatory year.

AusNet Services' Electricity Safety Management Scheme (ESMS) and Bushfire Mitigation Plan include network design, operation and maintenance programs that are targeted toward the reduction of fire start incidents.

2. Definitions

AusNet Services fire start report relies upon the following definitions;

Bushfire Risk Area – As determined by the Country Fire Authority in accordance with Section 80 of the Electricity Safety Act 1998 which require the assigning of a fire hazard rating for an area of 'high' or 'low'

Feeder Classification – AusNet Services has utilised the feeder classifications that have been defined for the service target performance incentive scheme (STPIS). Feeders are classified as central business district (CBD), Urban, Rural Short or Rural Long.

AusNet Services' network contains only Urban, Rural Short and Rural Long feeders. The STPIS definitions are:

- (a) Urban – not a CBD feeder, with actual maximum demand over the reporting period per total feeder route length greater than 0.3 MVA/km;
- (b) Rural short – not a CBD or Urban feeder with a total feeder route length less than 200km; *and*
- (c) Rural long – not a CBD or Urban feeder with a total feeder route length greater than 200km.

Fire Hazard Rating – Country Fire Authority fire danger ratings as published daily on the CFA website

Fire Start by Asset - In accordance with the categories defined in the Australian Energy Regulator's Regulatory Information Notice (RIN) fire start reporting template

Fire Start by Category – In accordance with the categories defined in the Australian Energy Regulator's Regulatory Information Notice (RIN) fire start reporting template.

Kind of Fire Start - In accordance with the categories defined in the Australian Energy Regulator's Regulatory Information Notice (RIN) for fire start reporting. These categories are derived from section 4 of the F-Factor Scheme Order in Council 2011.

3. Number of Fire Starts
