**Date:** Tuesday, 2 June 2020 8:32:29 PM

---

To whom it may concern

I am wishing to support the proposal for upgrading power lines to 3 phase.

This is a major road block to increasing productivity in the region

This will increase the productivity of dairy farmers as well as growing more Dairyfarms along side related industry

This will also increase the ability of the general public to connect solar panels to the grid

Not only will households be able to send renewable energy to the grid also there are other industries that have the ability too expand their business with more available power going passed their premises

Thanks

Bernie Free
