- Transgrid should be transparent & accountable to TAC about opportunities to influence the Revised Proposal
- Transgrid should continue to mature their approach to engagement
- We expect to see strong evidence of the impact of engagement on the Revised Proposal

- We recognise that Transgrid has many new developments on a number of fronts
- Upward pressure on revenue & prices (incl. escalations, new work, RIT-Ts)
- However, affordability and efficiency must be an **aggressive** thread through the proposal – consumer affordability concerns are escalating
- TAC – needs to consider the impact of the draft decision, what to accept ?

Thank you
