Dear Craig

RE: CITIPOWER 2019 PRICING PROPOSAL

Attached is our pricing proposal for direct control services in 2019 in line with the National Electricity Rules and the AER's final decision on CitiPower's Distribution Determination for the 2016 to 2020 regulatory control period.

As summarised in this submission, some movement in tariffs is proposed to ensure our prices and quantity estimates are in line with the total annual revenue allowance for the year.

Importantly, we estimate the percentage of cost attributed to distribution and metering charges remains at 27% of a typical CitiPower residential customer's annual electricity bill, or \$361 per annum.

CitiPower has been the lowest cost and most reliable network and one of the most efficient in the National Electricity Market.

We remain focussed on supplying safe, reliable and affordable electricity to our customers.

Kind regards

A handwritten signature in black ink, appearing to read 'Mark de Villiers', with a stylized, cursive script.
