Name: Citipower/Powercor

Email: roads_cp@powercor.com.au

Dear Citipower/Powercor,

Service Request Number: 4177270
Location: Heffernan Lane between Lonsdale Street and Little Bourke Street MELBOURNE
Purpose: Full closure of the laneway to facilitate power utility works
Commencement Date: Mar 30, 2020
Completion Date: May 10, 2020
Approved Hours: 7am to 6pm weekdays
8am to 3pm Saturday

Infrastructure and Assets Directorate has reviewed the TMP and offers no objection to the works and associated road and footpath closures subject to compliance with the following:

1. General traffic/pedestrian conditions

- **Consultation with all local properties affected by the closure must be undertaken prior to implementation, and the access arrangements of all businesses, construction sites and local residents must be accommodated as required. Local access must be maintained at all times.**
- Pedestrians must not be expected to traverse a carriageway to bypass the worksite other than at formal crossing points (i.e. signals, zebra crossings) or under the direct supervision of a traffic controller.

2. Specific conditions related to the TMP

Local Access

- Local access and egress for pedestrians and vehicles must be maintained at all times in all streets/laneways. Access must also be provided for all local businesses, off street garages and for the servicing of abutting properties, or suitable arrangements must be made with the occupiers.

Pedestrian Access Around Worksite (Partial Footpath Closure)

- All road and footpath closures must be supervised and maintained at all times. A minimum CLEAR 2 metre footpath width should be maintained for pedestrian access past the worksite. Where a footpath width of at least 1.5m cannot be maintained, rather than crossing the street, it is preferred that a pedestrian bypass be provided past the worksite. All temporary on road pedestrian bypasses must have appropriate barriers to protect pedestrians from

live traffic. Appropriate temporary kerb ramps must also be provided to cater for the needs of people with limited mobility. If it is not possible to maintain a 1.5m wide footpath or on-road pedestrian bypass, the applicant must ensure that suitable pedestrian crossing facilities (e.g. pedestrian bypass, signalised crossings, zebra crossings, etc.) are provided around the worksite or have traffic controllers assisting pedestrians traversing a carriageway.

Privately Owned Laneways

- Approval must be received from the relevant property owner for the use of Celestial Avenue, PL5370 for any local traffic detours as Celestial Avenue, PL5370 is/are privately owned (not Council owned).

Failure to comply with any of these conditions will allow the City of Melbourne to take any action it deems appropriate, including:

- revoking any permits or approvals issued for the project,
- issuing a notice under the Infringement Act 2006 (a fine), and / or
- taking further legal action for compensation for any injuries, damage or loss caused as a result of non-compliance with these conditions.

If you apply to alter the issued Traffic Management Approval letter, please quote the service request number. Failure to quote the number will result in the request not being processed.

Should you have any further enquiries please contact David Sisourath on [REDACTED].

Yours sincerely

[REDACTED]

Shirlene Yee Yet

Principal Engineer - Transport and Parking

3. Email Contacts

Please CC the following people/organisations when emailing the traffic management plan.

4. Additional Information

General Conditions Relating to Traffic Management Plans

A Traffic Management Plan approval will be issued subject to a number of conditions. The document below lists all the standard conditions which apply to every Traffic Management Plan approved by City of Melbourne.

<https://www.melbourne.vic.gov.au/sitecollectiondocuments/traffic-management-plan-standard-conditions.pdf>

Tree Protection

Trees grow in a delicate balance with their environment, and any changes to that balance must be minimised if the tree is to remain in a healthy state and fulfil its useful life potential. Information for developers, builders, service providers and contractors can be found in the tree protection fact sheets below.

<https://www.melbourne.vic.gov.au/sitecollectiondocuments/tree-protection-fact-sheet-developers-builders.pdf>

5. Activities within 100m of closure

A check of Infrastructure and Assets Directorate records has indicated that the following other approved road or footpath closures are planned for the area when these works are scheduled. The applicant MUST make contact with the below contractors to ensure the works and associated traffic management by all contractors do not conflict with each other and the integrity and safety of all combined closures and detours are maintained at all times.
