Dear Sir/Madam,

RE: SA POWER NETWORKS 2020-25 REGULATORY PROPOSAL

We refer to SA Power Networks 2020-25 Revised Regulatory Proposal that was submitted to you for consideration in December 2019. This letter is in support of SA Power Network's reliability initiatives, particularly the Low Reliability Feeder Program that will deliver significantly improved electricity supply to our worst-served residents.

The City of Victor Harbor recognises that a progressing electricity system requires investment and hopes that South Australia's infrastructure and policy evolves to meet the needs of customers whose rapid uptake of solar panels and electric vehicles are paving the way to a more sustainable future.

Thank you for your commitment to safe, reliable, affordable and cleaner electricity supply.

Yours faithfully

Victoria MacKirdy
Chief Executive Officer
