The AER has finalised an internal structure and WEMDRA is reporting to the Compliance & Enforcement branch. We are also at the end of a 3 year contract. This combination will provide an opportunity to reflect on the role, the changes in the market and realign the role for the next period.

In the final quarter of this year I will be working with the AER on a strategic plan for the role together with a project plan. We will also be establishing an expert engineering panel to assist with technical issues that arise.

I look forward to updating you on my progress in July.

Kind Regards
