

ElectraNet
Submission on benchmarking data templates
Submitted to the AER via email on 20 August 2013

Please find attached comments from ElectraNet on the draft TNSP RIN template provided for review below. I refer you in the first instance to the '1.Variables and definition' tab.

ElectraNet also notes that the audit timeframes proposed below are unlikely to be achievable in practice, given the intended issue of the final RIN in November and the requirement for completed audit assurance and Board sign-off by February 2014.

ElectraNet would be pleased to discuss any aspect of this feedback further if this would be of assistance.
