

Australian Pipeline Trust

Public Register

Roma to Brisbane Pipeline

1. Spare Capacity

The following table identifies the amount of spare capacity available at current delivery points on the pipeline.

Delivery Point	Spare MDQ (TJ/day)
Condamine (see Note 1)	0
Dalby	0
Oakey	0
Toowoomba	0
Swanbank	0
Sandy Creek	0
Brightview	0
Riverview	0
Redbank	0
Carole Park	0
Ellengrove	0
Runcorn	0
Mt Gravatt	0
Tingalpa	0
Doboy	0
Murrarie	0
Gibson Island	0

Note 1. Spare capacity at Condamine would need to be investigated on case by case basis.

Note 2. Above estimates of spare capacity is based on assumption that gas is receipted at Wallumbilla.

Note 3. MDQ – maximum daily quantity.

Note 3. TJ = terra joule.

2. Planned and Developable Capacity

1. The potential to develop additional capacity is subject to shippers contracting for additional capacity on terms that allow APT to implement development of additional capacity on terms acceptable to APT.
2. An expansion of the pipeline which could be implemented by January 2008 is being investigated. The capacity from this expansion is expected to be fully committed by the date that this expansion is approved.
3. The lead time for the development of additional capacity is approximately 2 years from the date of execution of contracts with potential users.

3. Unutilised Contracted Capacity

No users have provided information concerning unutilised contracted capacity.
