Dear Mr Anderson,

**Submission on the AER Issues Paper: SA electricity distribution determination, SA Power Networks 2020-2025**

Thank you for the opportunity to comment on the AER Issues Paper: SA electricity distribution determination, SA Power Networks 2020-2025 ('the Issues Paper').

I have had the benefit of reading the submission from the Clean Energy Council and the submission from TESLA and I wholeheartedly endorse their comments. In particular, I believe their comments on the need for ICT for DER integration and the importance of dynamic management strategies to be particularly prescient. I also echo their concerns about overreliance on local inverter protections.

Should you wish to discuss any of these issues further with me, I may be contacted either on [REDACTED] or alternatively, via email at [REDACTED].

Yours sincerely

Dr Penelope Crossley
