

To whom it may concern,

I, Rachael McGrath, am a resident of the Great South Coast, living in Orford.

I am aware of the proposal to upgrade Tyrendarra, Strathdownie, Cape Bridgewater and Gorae West to three-phase power and I fully support this initiative as it will benefit our region as a whole through the economic and social flow-on effects to other businesses and the wider community.

I am a young farmer, managing our family farm and am working towards an ownership role. I want to drive our business ahead and think that every manufacturing business should have access to 3 phase power. Regional businesses should have equal opportunity as city businesses.

Thank you for your consideration.

Kind regards,

Rachael McGrath
