COVID-19 RETAIL MARKET DATA DASHBOARD

Disconnections for non-payment - Weekly summary (submitted daily on exception basis) As at 28/09/2020 Disconnections Disconnections (40 retailers reported) Last Week 288 Total number of disconnections *total disconnections minus customers Net disconnections* 142 reconnected by the same retailer within a Total number of retailers disconnecting customers 5 Debt weekly & quarterly trends - residential & small business customers

As at 28/9/2020

The total number of disconnections increased from last week as part of a continuing upwards trend since many retailers recommenced disconnections from early August.

Residential electricity (24 included submissions)

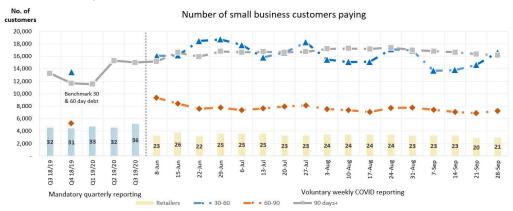

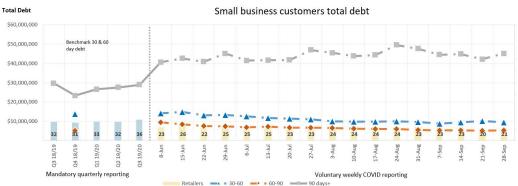

Debt

This data includes 30, 60 & 90+ day debt metrics. 90+ day total debt is higher than 30 and 60 day debt, because 90+ day debt covers a longer time period i.e. 90 days or older. Customers who are in debt for longer periods typically accumulate higher debts. The bars show the number of retailers which submitted data on 90+ day debt. Fewer retailers have submitted data for 30 and 60 day debt.

Small business electricity (21 included submissions)

Deferred Debt (11 included submissions)

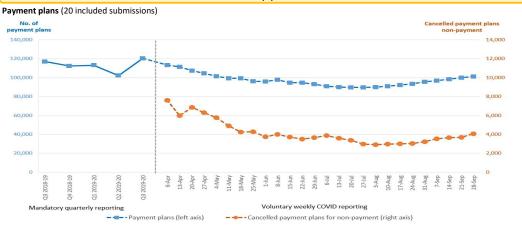

Number of customers
Residential 36143
Sml Bus. 1995

Deferred debt

Many retailers have allowed customers to defer payments rather than using payment plans or hardship programs during the pandemic. However, a number of retailers stopped offering such arrangements as at 31 July. A significant drop occurred from 24 August, though since 14 September deferred debt levels have stablised.

Payment plans - Electricity & Gas As at 28/9/2020

Payment plans

Contrary to expectations, the number of customers on payment plans is lower than as at 03 2019-2020. However, payment plans began to rise in recent weeks driven by one Tier 1 retailer moving customers off deferred payment arrangements and onto regular payment plans. Note that, unlike quarterly data, the weekly data for this indicator represents a subset of all retailers (covering approximately 97.5% of market share).

Credit collections

30/03/2020

The few retailers that reported against this indicator reported a non-zero number of credit collections, contrary to expectations. Based on discussions with the retailers concerned, they continue to repurpose their credit collection functions to provide payment assistance related to the pandemic. As such, these are not credit collections under AER's definition.

Dashboard NB: This dashboard incorporates additional data from previous weeks resulting in a more complete and robust data report.
