Reference Tariffs and Reference Tariff Policy

| SP AusNet | Reference Tariffs and Reference Tariff Policy | |
|---------------------------|--|---|
| Gas Acces | ss Arrangement Revision 2008-2012 2013-2017 | |
| (1) | notify the Regulator in writing of the Haulage Reference Tariffs that will replace the withdrawn Haulage Reference Tariffs; | Formatted: Left, Indent: Left: 1.27 cm, Hanging: 1.27 cm |
| (2) | where Haulage Reference Tariffs will be reassigned to more than one Distribution Supply Point in Calendar Year <i>t</i> , provide a breakdown of the actual Quantities, in relevant units, that were distributed under each existing Haulage Reference Tariff Component to these Users under the existing parent Haulage Reference Tariffs in Calendar Year <i>t</i> -2; and | ı F |
| (3) | where Haulage Reference Tariffs have been reassigned to more than one Distribution Supply Point in Calendar Year $t-1$, provide a breakdown of the actual Quantities, in relevant units, that were distributed to these Users under each Haulage Reference Tariff Component which existed immediately prior to the reassignment under the parent Haulage Reference Tariffs that previously existed in Calendar Year $t-1$. | l , t |
| 1.5 Provis i | ion of Information on Tariffs by the Distribution Business | |
| Year. The Ta | on business will prepare and publish a public Tariff Report, by 1 March of each Calendar ariff Report should contain sufficient information to enable distribution customers to ne basis for the tariff policies adopted by the distribution business. | |
| The report wi | Il contain the information as set out in Box 12.1 of the GAAR 2008 Final Decision | |
| <u>.</u> | | |
| year (| be submitted to the regulator 60 business days prior to the end of the calendar Calendar Year where the distributorService Provider proposes to introduce new tariffs or and tariff structures in the subsequent calendar yearCalendar Year | |
| year<u>(</u> | be submitted to the regulator 35 business days prior to the end of the calendar <u>Calendar Year</u> where the <u>distributorService Provider</u> does not propose to introduce new s or amend tariff structures in the subsequent calendar year<u>Calendar Year</u> | |
| 2 Ancilla | ry Reference Tariffs | |
| | | |
| 2.1 Existin | g Ancillary Reference Tariffs | |
| | Year 20082013, the Ancillary Reference Tariffs for Ancillary Reference Services that rom 1 January 20082013, are set out in Schedule 2clause 10. | Formatted: Left |
| 2.2 Adjust | ments to Ancillary Reference Tariffs | |
| with the form | Provider will make annual adjustments to the Ancillary Reference Tariffs in accordance ula below. For the avoidance of doubt, Ancillary Reference Tariffs are not adjusted in vith the Tariff Control Formula or rebalancing control formula in clause 3. | |
| | $ART_{t} = ART_{t-1} \bullet (1 + CPI_{t})$ | |
| where: | | |
| ART_t is the A | Ancillary Reference Tariff that applies in Calendar Year <i>t</i> ; | |
| ART_{t-1} is the | Ancillary Reference Tariff that applies in Calendar Year t-1; and | |
| | | 11/-/_4€ |
| | | - |

CPI, is the CPI for Calendar Year t, as defined in the Glossary.

3 Haulage Reference Tariff Control Formula

is the Licence Fee Factor for Calendar Year t, as defined below-

 $\frac{X_r}{x_r}$ = 0.109 for the remainder of the Calendar Year 2008 to apply from 1 July 2008 and = 0.0 for each of the Calendar Years 2011 and 2012; and

 $-\underline{L_t X_t}$ is <u>0.0388;</u>

_13<u>/-/</u>4€

The Tariff Control Formula for the Calendar Year 2009 is:

$$\frac{(1+CPI_{t})(1-X_{t})(1+L_{t})(1+O)}{\sum_{i=1}^{n}\sum_{j=1}^{m}p_{t}^{ij}\bullet q_{t-2}^{ij}}$$

where the Service Provider has n Reference Tariff categories, each category having up to m Reference Tariff components and where:

 p_t^{ij} <u>is an approved Pass Through Factor for Calendar Year t</u>, as defined below; and

At-1 is the approved Pass Through Factor in relation to Carbon Liability for Calendar Year t-1.

The Tariff Control Formula for the Calendar Year 2014 to 2017 is:

$$(1 + CPI_{t})(1 - X_{t})(1 + L_{t})(1 + A_{t}) \ge \frac{\sum_{i=1}^{n} \sum_{j=1}^{m} p_{t}^{ij} * q_{t-2}^{ij}}{\sum_{i=1}^{n} \sum_{j=1}^{m} p_{t-1}^{ij} * q_{t-2}^{ij}}$$

where the Service Provider has n Haulage Reference Tariff categories, each category having up to m Haulage Reference Tariff Components and where:

 \mathcal{P}_{t-1}^{y} pi is the Haulage Reference Tariff being charged for Haulage Reference Tariff Component *i* of Haulage Reference Tariff *i* in Calendar Year *t* 1;

 q_{i-2}^{ij} is the quantity of Haulage Reference Tariff Component *j* of Haulage Reference Tariff *i* that was sold in Calendar Year *t* 2;

CPI, is the CPI for Calendar Year t, as defined in the Glossary;

 $X_{t} = 0.0;$

 L_{t_1} is the Licence Fee Factor for Calendar Year t, as defined below; and

O is the adjustment factor *O* to account for the unrecovered quantities from the Order In Council, as defined below.

The Tariff Control Formula for the Calendar Year 2010 is:

19//46

 WGP_{actual} is the actual wholesale gas price (real, \$/GJ) in year t-2 measured as the weighted

average spot price for the twelve months to December in year t-2 calculated using the Australian Energy Market Operator's published Victorian gas prices and withdrawals

- δ is the estimated amount by which residential gas use for all residential customers varies with a 1 per cent increase in the wholesale gas price in year t 2, and is (in GJ):
- <u>11,216 in 2013;</u>
- <u>11,270 in 2014;</u>
- <u>11,321 in 2015;</u>
- <u>11,364 in 2016; and</u>
- <u>11,411 in 2017.</u>
- <u>*RR*_{avg}</u> is the average price for the usage (through-put) based Haulage Reference Tariff components applicable to residential customers and is calculated as:

$$RR'_{avg} = \frac{\sum_{i=1}^{n} \sum_{j=1}^{m} p_{t-2}^{ij} q_{t-2}^{ij}}{\sum_{i=1}^{n} \sum_{j=1}^{m} q_{t-2}^{ij}}$$

where:

 $\frac{p_{t-2}^{ij}}{\text{Tariff component } i \text{ of reference tariff } j \text{ in year } t-2 (\text{in}/\text{GJ}); \text{ and}}{\text{Tariff component } i \text{ of reference tariff } j \text{ in year } t-2 (\text{in}/\text{GJ}); \text{ and}}$

 $\frac{q_{t-2}^{ij}}{t-2}$ is the quantity delivered against Haulage Reference Tariff component p_{t-2}^{ij} in year t-2.

- α is the estimated amount by which commercial gas use for all commercial customers that are not an Tariff M or Tariff D varies with a 1 per cent increase in the wholesale gas price in year t-2, and is (in GJ):
- <u>13,798 in 2013;</u>
- <u>13,890 in 2014;</u>
- <u>13,900 in 2015;</u>
- 13,849 in 2016; and
- <u>13,838 in 2017.</u>

<u>RC_{avg}</u> is the average price for the usage (through-put) based Haulage Reference Tariff components applicable to commercial customers and is calculated as:

_20//_4€

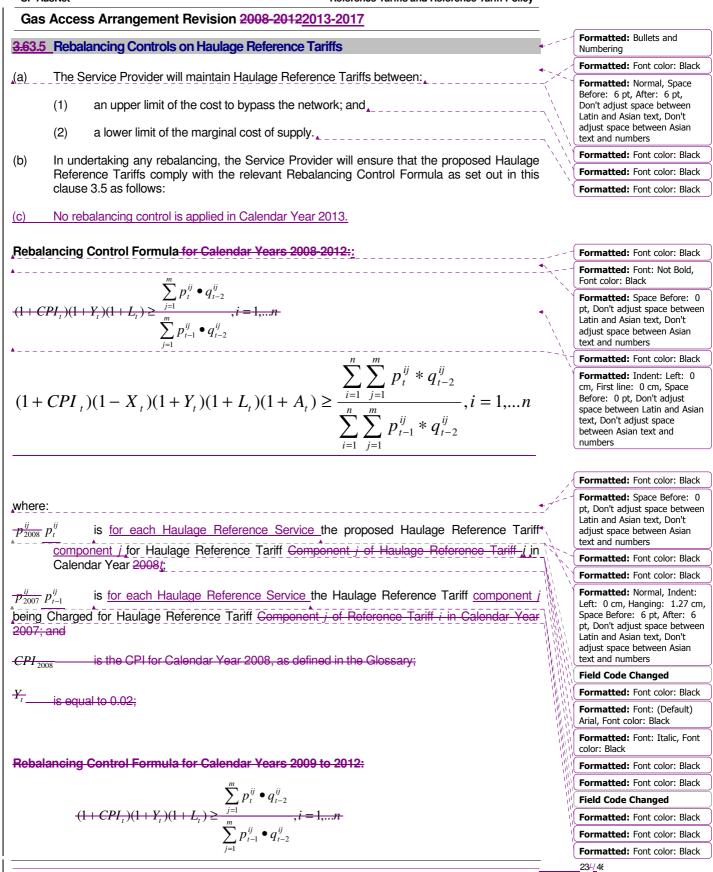

Haulage Reference Tariff Components in Calendar Year t-1, the $p_{t-1}^{"}$ term in clause 3.1 will be interpreted in relation to the reasonable estimates of the Quantities that would have been distributed, in relevant units, if the Haulage Reference Tariff Components had existed in Calendar Year t-2, as provided by the Service Provider in accordance with clause 1.3(i).

new Haulage Reference Tariff.

| where: | | | |
| <u>MCTR_t</u> | is determined by the formula in clause 3.7.1; and | | |
| <u>CTR_t</u> | is the total of the Service Provider's proposed Carbon Tariffs – defined as 'the uplift in Reference Tariffs directly associated with the recovery of Service Provider's Carbon Liability' - in Calendar Year t multiplied by the corresponding forecast quantities to be distributed for each tariff component of each tariff, in Calendar Year t. | | |
| 3.7.1 Maxim | um Carbon Tariff Revenue (MCTR _t) | | |
| <u>MCTR_t is exp</u> | pressed by the formula as set out below: | | |
| | $\underline{MCTR_{t} = CTP_{t} - K_{t}}$ | | |
| where: | | | |
| | | | |

is the maximum revenue the Service Provider is allowed to receive from its Carbon **MCTR**_t Tariffs from all distribution customers for the Calendar Year t;

- is the aggregate of all charges which the Service Provider forecasts it will be required to CTP_t pay in Carbon Liability in respect of Calendar Year t, and
- K_t is determined in accordance with clause 3.7.2.

3.7.2 Correction factor K_t

- K_t is a correction factor to account for any under or over recovery of actual revenue from Carbon Tariffs in relation to allowed revenue from 3.7 tariffs.
- K_t is determined by reference to the formula set out below.

$$K_{t} = (Ky_{t} + Kz_{t} + K_{t-1})(1 + CPI_{t})(1 + pretaxWACC_{D})$$

where:

- Kyt is calculated in accordance with clause 3.7.3;
- is calculated in accordance with clause 3.7.4; Kzt
- Kĩ-1 is the figure calculated for K_t for Calendar Year t-1;

pretax WACC_D is 0.0725; and

CPIt is the CPI for Calendar Year t, as defined in the Glossary.

3.7.3 Calulation of Kyt

 Ky_t is a correction factor determined with reference to the formula in this clause.

$$Ky_t = CTR_{t-1} - CTP_{t-1}$$

Beference Tariffs and Beference Tariff Policy

4 Approval of Annual and Within-Year Variations to Haulage Reference Tariffs and New Haulage Reference Tariffs

4.1 Submission to the Regulator

SP AusNet

- (a) The Service Provider will, at least 35 Business Days prior to the commencement of the next^{*} Calendar Year, submit proposed Haulage Reference Tariffs to apply from the start of the next Calendar Year for verification of compliance by the Regulator, in accordance with clauses 4.2(a), (b), (c) and (d).
- (b) Where the Service Provider proposes to change a Haulage Reference Tariff within a Calendar Year, it will submit the proposed Haulage Reference Tariff change for verification of compliance by the Regulator, in accordance with clauses 4.2(a), (b) and (c).
- (c) Where the Service Provider proposes to introduce a new Haulage Reference Tariff or new Haulage Reference Tariff Component or withdraw an existing Haulage Reference Tariff or existing Haulage Reference Tariff Component within a Calendar Year it will submit the proposal for verification of compliance by the Regulator, in accordance with clauses 4.2(a), (b), (c) and (d).

Formatted: Indent: Left: -0.02 cm, Hanging: 1.02 cm

(d) The Service Provider will ensure its proposed Haulage Reference Tariffs or proposed changes to Haulage Reference Tariffs submitted under clauses 4.1(a), (b) or (c) comply with the Tariff Control Formula and rebalancing control formulae in clause 3.

4.2 Assessment by the Regulator

- (a) The Regulator will provide the Service Provider with written notice of whether or not it has^{+ -} verified the Haulage Reference Tariffs proposed by the Service Provider and submitted under clauses 4.1(a), (b) or (c) as compliant with the Tariff Control Formula and the rebalancing control formulae. If the Regulator declines to verify the proposed Haulage Reference Tariffs as compliant, the Regulator must provide a written statement of reasons for that decision.
- (b) The proposed Haulage Reference Tariffs will be deemed to have been verified as compliant in writing by the Regulator by the end of 15 Business Days from the date on which the Regulator received the Service Provider's notification under clauses 4.1(a), (b) or (c) unless the Regulator has notified the Service Provider in writing that it has declined to verify the proposed Haulage Reference Tariffs as compliant.
- (c) If the Regulator issues a written notice to the Service Provider that it has declined to verify proposed Haulage Reference Tariffs and/or Haulage Reference Tariff Components (including but not limited to any new Haulage Reference Tariff and/or any new Haulage Reference Tariff Component) as compliant for a Calendar Year t, then:
 - (1) if the relevant left-hand side of the price control formula set out in clause 3.1 is >1* then the Haulage Reference Tariffs applying in Calendar Year t-1 are scaled up by the relevant left-hand side of the price control formula set out in clause 3.1; or
 - (2) if the relevant left-hand side of the price control formula set out in clause 3.1 is <1 then the Haulage Reference Tariffs applying in Calendar Year t-1 are scaled down by the relevant left-hand side of the price control formula set out in clause 3.1.
- (d) If the Regulator has notified the Service Provider in writing that it has declined to verify as^{*-} compliant the withdrawal of any existing Haulage Reference Tariffs and/or the withdrawal of any existing Haulage Reference Tariff Components proposed for Calendar Year *t*, then:
 - (1) if the relevant left-hand side of the price control formula set out in clause 3.1 is >1⁺⁻ then the Haulage Reference Tariffs applying in Calendar Year t-1 are scaled up by the relevant left-hand side of the price control formula set out in clause 3.1; or
 - (2) if the relevant left-hand side of the price control formula set out in clause 3.1 is <1 then the Haulage Reference Tariffs applying in Calendar Year t-1 are scaled down by the relevant left-hand side of the price control formula set out in clause 3.1.
- (e) The Service Provider may provide additional information and resubmit or revise its proposed Haulage Reference Tariffs in accordance with clauses 4.1(a), (b) or (c) if the Regulator declines to verify as compliant proposed Haulage Reference Tariffs under clause 4.2(a) provided that if, in a Calendar Year, changes to Haulage Reference Tariffs have been verified as compliant by the Regulator, the Service Provider will notify in writing all Users affected by the changes as soon as practicable.

4.3 Information Required from the Service Provider

At the same time as submitting proposed Haulage Reference Tariffs to the Regulator, the Service^{*} Provider will also provide to the Regulator, information demonstrating that the proposed Haulage Reference Tariffs are, to the extent relevant, consistent with the Tariff Control Formula and rebalancing control formulae in clause 3.

4.4 Default Haulage Reference Tariffs for new Calendar Year t

If the Service Provider does not, at least 35 Business Days prior to the commencement of the next^{* –} Calendar Year *t* submit proposed Haulage Reference Tariffs to apply from the start of the next Calendar Year *t* in accordance with clause 4.1(a) then:

- (a) where the left-hand side of the Tariff Control Formula to be applied for Calendar Year t is* greater than one, the Haulage Reference Tariffs applying in Calendar Year t-1 will be scaled up by the left-hand side of the Tariff Control Formula to be applied for Calendar Year t and will apply for Calendar Year t and the Haulage Reference Tariff Components applying in Calendar Year t-1 will be scaled up and applied accordingly; and
- (b) where the left-hand side of the Tariff Control Formula to be applied for Calendar Year *t* is less than one, the Haulage Reference Tariffs applying in Calendar Year *t*-1 will be scaled down by the left-hand side of the Tariff Control Formula to be applied for Calendar Year *t* and will apply for Calendar Year *t* and the Haulage Reference Tariff Components applying in Calendar Year *t*-1 will be scaled down and applied accordingly.

Until such time as the Regulator has, or been deemed to have, verified Haulage Reference Tariffs⁺ and/or Haulage Reference Tariff Components for Calendar Year t as compliant in response to a submission by the Service Provider.

5 Calculation of Charges for Haulage Reference Tariffs

Haulage Reference Tariffs are charged in accordance with the calculations described below:

5.1 Distribution Fixed Tariff Components

The Distribution Fixed Tariff Components and consumption ranges shown in <u>Schedule 1clause 9</u>, as^{*} applicable, are daily amounts. The Distribution Fixed Tariff Component or consumption range applied to calculate a Charge for a billing period in Calendar Year t shall be the Distribution Fixed Tariff Component applying in Calendar Year t or consumption range shown in <u>Schedule 1clause 9</u>, as applicable, multiplied by the number of days in the billing period.

5.2 Distribution Volume Tariff Components

- (a) Distribution Volume Tariff Components are Charged according to the actual GJs of Gas^{*} withdrawn in the billing period, or an estimate of the GJs of Gas withdrawn in the billing period which is acceptable to the Service Provider.
- (b) Where some of the days in the billing period are in the Peak Period:

The GJs of Gas withdrawn in the Peak Period are:

$$\mathsf{GPP} = \mathsf{TAG} \times \frac{PPBP}{TBP}$$

where:

GPP is defined as the GJs of Gas withdrawn in the Peak Period;

TAG is defined as the total actual GJs of Gas withdrawn in the billing period, or an estimate of the total GJs of Gas withdrawn in the billing period which is acceptable to the Service Provider;

PPBP is defined as the number of days in the billing period which are in the Peak Period; and

TBP is defined as the total number of days in the billing period.

5.3 **Distribution Demand Tariff Components**

Distribution Demand Tariff Components are charged according to the following formula:

$$MC = \frac{EAC - CBTD}{RBP}$$

where:

MCis the charge for a particular month in Regulatory Year "t".

EAC is the estimated annual charge calculated by applying the relevant Haulage Reference Tariff Components to EAD;

CBTD is the sum of the charges for all prior billing periods of Regulatory Year "t";

is the remaining billing periods in Regulatory Year "t", as set out below: RBP

| RBP |

6 Reference Tariff Policy

Under the Access Code, an Access Arrangement must include a policy describing the <u>This clause 6</u> sets out the principles that are to be used to determine a Reference Tariff (a Reference Tariff Policy). This clause 6 sets out the Service Provider's Reference Tariff Policy which has been developed in accordance with section 8 of the Access Code.

6.1 CPI - X Price Path

The CPI - X price path approach is consistent with section 8.3 of the Access Code fixed principle in clause 7.2(a)(1). The Service Provider adopts this approach.

6.2 New Facilities Investment

The Service Provider may at its discretion undertake <u>New Facilities Investment-Capital Expenditure</u> that does not satisfy the requirements of <u>section 8.16 of the Access CodeNew Capital Expenditure</u> <u>Criteria under the National Gas Rules</u>. The Extensions / Expansions Policy in clause 5.6 of Part A of this Access Arrangement explains how <u>New Facilities InvestmentCapital Expenditure</u> in relation to a New Facility which is to be treated as part of the Covered Pipeline will affect Reference Tariffs.

Clause 6.3 below sets out the principles of a Speculative <u>Capital</u> Investment <u>FundAccount</u> which the Service Provider may operate in relation to <u>New Facilities InvestmentCapital Expenditure</u> that does not satisfy the requirements of <u>section 8.16 of the Access Code the New Capital Expenditure Criteria</u> <u>under the National Gas Rules</u>.

6.3—Speculative Investment Fund

6.3 Capital Expenditure Account

In accordance with section 8.19 of the Access CodeRule 84 of the National Gas Rules, the amount of the Speculative Investment FundCapital Expenditure Account for the Service Provider at any time is equal to:

- (a) the difference between the <u>New Facilities InvestmentCapital Expenditure</u> and the amount* which satisfies section 8.16 of the <u>Access Codethe requirements of the New Capital</u> <u>Expenditure Criteria under the National Gas Rules</u>, less any amount the Service Provider notifies the Regulator (at the time the expenditure is incurred) that it has elected to recover through a <u>Surcharge under section 8.25 of the Access Codesurcharge under Rule 83 of the</u> <u>National Gas Rules</u>; plus
- (b) an annual increase in that amount calculated on a compounded basis at a risk adjusted Rate of Returnrate of return approved by the Regulator; less
- (c) any part of the Speculative Investment FundCapital Expenditure Account previously added to^{*} the Capital Base due to the type and volume of services provided using the increase in Capacity attributable to the New Facility change such that any part of the Speculative Investment FundCapital Expenditure Account would then satisfy the requirements of section 8.16 of the Access Codethe New Capital Expenditure Criteria under the National Gas Rules.

6.4 Efficiency Incentive and Carry-over Mechanism

Section 8.44 of the Access Code provides for a Service Provider's Reference Tariff Policy to include an incentive mechanism that permits the Service Provider to retain all, or any share of any, returns to the Service Provider from the sale of the Reference Services: **Formatted:** Indent: Left: -0.02 cm, Hanging: 1.29 cm

| (5) | For operating expenditure, the additional reward (penalty) associated with initiatives [*] undertaken in a particular year would reflect the reduction (increase) in the level of recurrent operating expenditure in excess of the assumed productivity gain (as reflected in expenditure forecasts) over that year. | Formatted: Left, Indent: Left: 1.27 cm, Hanging: 1.27 cm | | |
| | | 32-/_4€ | | |

Gas Access Arrangement Revision 2008-2012 2013-2017

(6) For capital expenditure, the additional reward (penalty) associated with initiatives undertaken in a particular year would reflect the reduction (increase) in financing costs resulting from the difference between the actual and benchmark assumption for capital expenditure in that year. The financing savings would be calculated as the regulatory WACC (the pre-tax WACC applying to the Service Provider, which = 0.077 for the ThirdFourth Access Arrangement Period) multiplied by the capital expenditure saving.

- (b) The mechanism for carrying over efficiency gains
 - (1) For operating expenditure, it will be assumed that the Service Provider does not* achieve more than the forecast productivity gain between the penultimate and last years of the <u>ThirdFourth</u> Access Arrangement Period. As a result, if the Service Provider makes an efficiency gain in the last year of the <u>ThirdFourth</u> Access Arrangement Period, there would be no carryover in respect of that year. However, the operating expenditure benchmark for the <u>FourthFifth</u> Access Arrangement Period will then be higher than otherwise for the <u>FourthFifth</u> Access Arrangement Period by the amount of the efficiency gain.
 - (2) For capital expenditure, it would be assumed that the actual expenditure in the last year of the <u>ThirdFourth</u> Access Arrangement Period was equal to the forecast for that year. As a result, if the Service Provider makes an efficiency gain in the last year of the <u>ThirdFourth</u> Access Arrangement Period, there would be no carryover in respect of that year. However, the regulatory asset base (and thus the return on assets) would be higher than otherwise over the next period. At the following review, the regulatory asset base would be adjusted to take account of the difference between the forecast and actual capital expenditure for the last year of the <u>ThirdFourth</u> Access Arrangement Period.
 - (3) There would be no adjustment to the original expenditure benchmarks against which the assessment of the efficiency gains in excess of the forecast would be measured, with the following exceptions:
 - (A) the carryover of cost-related efficiency gains will be calculated in a manner that takes account of any change in the scope of the activities which form the basis of the determination of the original benchmarks. The <u>Benchmarks for</u> the purpose of calculating efficiency gains and determining capital expenditure to be assumed to occur in 2017 will be revised as follows:

For the low and medium pressure mains replacement benchmarks:

- (Actual¹/Forecast² km replaced Benchmark km replaced) × benchmark unit rate per km
- For the residential and commercial meter replacement benchmarks:

(Actual³/Forecast⁴ meters replaced – Benchmark meters replaced) × benchmark unit rate meter replacement

For scope changes relating to other programs the Service Provider will* provide information in relation to any change in scope as part of the Access Arrangement Information submitted on 30 March <u>20122017</u>. This information will, without limitation, quantify and substantiate the impact of the scope changes on the original benchmarks; and

- (B) the carryover in respect of cost-related efficiency gains will be calculated in a manner that takes account of the difference between forecast and actual growth by adjusting the original benchmarks on the basis of the difference between the actual number of connections in any Calendar Year and the assumed numbergrowth and the growth forecast at the time of connections
- ¹ For the years 2013-2016 ² Updated forecast for 2017 as determined within the 2018-2022 GAAR
- ³ For the years 2013-2016

(g) how the Service Provider proposes to allocate the Pass Through Amount over that period and between Users and the price or charging structure that the Service Provider proposes to use to recover the Pass Through Amount from Users (being, the basis on which the Service Provider proposed the Pass Through Amount is to apply).

If a Declared Retailer of Last Resort Event occurs, a Service Provider may give a statement to the Regulator within 120 Business Days of the Relevant Pass Through Event occurring specifying the actual financial impact of the Declared Retailer of Last Resort Event on the Service Provider. This is in addition to the provision of the estimated financial effect in accordance with clause 8.1(c).

8.2 Obligations of the Regulator

- (a) If the Regulator receives a statement under clause 8.1, the Regulator must decide whether the Relevant Pass Through Event specified in the statement occurred or is continuing, and if the Regulator decides that the Relevant Pass Through Event occurred or is continuing, the Regulator must decide:
 - (1) the Pass Through Amount; and
 - (2) the basis on which the Pass Through Amount is to apply,

and notify the Service Provider in writing of the Regulator's decision.

- (b) If the Regulator does not give a notice to the Service Provider under clause 8.2(a) within 30^{*} Business Days of receiving a statement from the Service Provider under clause 8.1, on the 31st Business Day after receiving the statement from the Service Provider under clause 8.1, the Regulator is taken to have notified the Service Provider of its decision under clause 8.2(a) that the Pass Through Amount and the basis on which the Pass Through Amount is to apply are as specified in the statement given by the Service Provider under clause 8.1.
- (c) Where the Relevant Pass Through Event specified in a statement submitted under clause 8.2(a) relates to a Declared Retailer of Last Resort Event, the time elapsed between submission by the Service Provider of the estimated financial impact in accordance with clause 8.1(a) and submission of the actual financial impact in accordance with clause 8.1(b) does not count towards the 30 Business days in clause 8.2(b).

8.3 Powers of the Regulator where a Relevant Pass Through Event occurs

- (a) If a Relevant Pass Through Event occurs and the Service Provider is likely to be affected by the Relevant Pass Through Event does not give the Regulator a statement under clause 8.1 concerning the Relevant Pass Through Event, the Regulator may decide:
 - (1) the Pass Through Amount;
 - (2) the date from and period over which the pasPass Through Amount can be charged;
 - (3) the basis on which the Pass Through Amount is to apply.
- (b) Where under clause 8.3(a) the Regulator decides on a Negative Pass Through Amount, the^{*−} Regulator:
 - (1) may decide to require the Service Provider to pass through the Negative Pass* Through Amount decided by the Regulator on the basis decided by the Regulator; and

where the Regulator decides to require the Service Provider to pass through the (2)Negative Pass Through Amount, the Regulator must notify the Service Provider in writing of the Negative Pass Through Amount, the basis on which the Negative Pass Through Amount is to apply and the reasons for the Regulator's decision.

Factors which the Regulator Must Consider 8.4

In deciding the Pass Through Amount and the basis on which the Pass Through Amount is to apply under clauses 8.2 and 8.3, the Regulator must ensure that the financial effect on the Service Provider associated with the Relevant Pass Through Event concerned is economically neutral taking into account:

- the relative amounts of Reference Services supplied to each User; (a)
- the time cost of money for the period over which the Pass Through Amount is to apply; (b)
- (C) the manner in which and period over which the Pass Through Amount is to apply;
- (d) the financial effect to the Service Provider associated with the provision of Reference* Services directly attributable to the Relevant Pass Through Event concerned, and the time at which the financial effect arises:
- (e) the amount of any change in another tax which, in the Regulator's opinion, was introduced as complementary to the Relevant Pass Through Event concerned;
- (f) the effect of any other previous Relevant Pass Through Event since the later of the date on which:
 - (1) this Access Arrangement takes effect; and
 - (2)the last decision made under clauses 8.2 and 8.3;
- any Pass Through Amount applied under this clause 8 relating to a previous Relevant Pass* (g) Through Event which resulted in the Service Provider recovering an amount either more or less than the financial effect on the Service Provider of that previous Relevant Pass Through Event; and
- (h) any other factors the Regulator reasonably considers relevant.

8.5 When the Service Provider applies a Pass Through Amount

The Service Provider: (a)

Gas Access Arrangement Revision 2008-20122013-2017

Notes

Postcode 3055 is shared with Envestra, SP AusNet <u>Gas supply Distribution Supply</u> Points are in Galtes Crescent, Southam Street, Morrow Street, Hopetoun Avenue, Moreland Road, and Flannery Court.

Postcode 3551 is supplied under both West Zone and Adjoining West Zone. Adjoining West Zone rates apply to supply pointsDistribution Supply Points west of Sparrowhawk Road- and south of the Calder Highway and all supply pointsDistribution Supply Points west of Maiden Gully Road.

Postcode 3352 is supplied under both West Zone and Adjoining West Zone. Adjoining West Zone rates apply to <u>supply pointsDistribution Supply Points</u> in Forest Street, Gillies Road, and Olliers Road north of Western Freeway.

Billing Parameters

Distribution tariffs are charged in accordance with the billing parameters outlined in Part A<u>C</u> of the *Access Arrangement* by SPI Networks (Gas) Pty Ltd (formerly TXU Networks (Gas) Pty Ltd) as varied by licence condition on 7 October 2004.

DOMESTIC – Domestic tariffs will be applied to premises where the predominant consumption of gas is for non-commercial or non industrial residential purposes.

NON DOMESTIC – Non Domestic tariffs will be applied to all premises where the predominant consumption of gas is for commercial or industrial purposes.

TARIFF M -- A separate Operations & Maintenance (O&M) charge is not applicable to Tariff M customers. Customers may still be charged unrecovered infrastructure costs (LCC) where applicable.
