

Stockland

Application for an Individual Exemption

Stockland Baulkham Hills

375 – 383 Windsor Rd,

Baulkham Hills, NSW 2153

ABOUT STOCKLAND

Stockland is one of the largest diversified property groups in Australia – owning, developing and managing a large portfolio of retail town centres, workplace and logistics assets, residential communities and retirement living villages. Founded in 1952, today Stockland leverages its diversified model to help create sustainable communities where people live, shop and work.

As a real estate owner, manager and developer, we believe that we have both the opportunity and the responsibility to create the right balance of social, environmental and economic conditions for our communities, customers and investors now and in the future.

Our sustainability strategy focusses on this opportunity to deliver shared value; that is delivered economic value in a way that also create value for society by addressing its needs and challenges.

Electricity prices for our tenants may have been escalated at a significant rate over the past 24 months and creating embedded networks that incorporate embedded generation would allow Stockland to sell electricity to our tenants at tariffs that are lower than market offers.

Stockland finance capital works related to the establishment of the embedded networks and that may include infrastructure upgrade and replacements.

The applicant, by means of this application, will demonstrate that we undertake to observe all conditions including 4.9.1 to 4.9.6 of the Network Exemption Guidelines. The applicant wishes to register for the Individual Exemption Class NRI to be converted to NR1, NR5, R1 and R5.

Part 1: General Information:

1. Legal name

Stockland Property Management Pty Ltd ABN 22 000 059 398(**Applicant**)

2. Trading Name

Stockland Baulkham Hills

3. Australian Business Number (ABN) or Australian Company Number (ACN)

ABN - 22 000 059 398

4. Registered postal address for correspondence

Stockland
Level 25, 133 Castlereagh Street Sydney 2000

5. Nominated contact person

Jim Tatsis
National Manager, Group Asset Management and Operations
Stockland, Level 29, 133 Castlereagh St, Sydney 2000
T +61 2 9035 3212
E jim.tatsis@stockland.com.au

6. Why you are seeking an individual exemption, and why you believe that an exemption (rather than retailer authorisation) is appropriate to your circumstances?

The Applicant is seeking an individual exemption to on-sell electricity through an embedded network located at the Stockland Baulkham Hills Shopping Centre.

The Applicant is a property manager of the Stockland Baulkham Hills and the proposed on-selling activity, which will be conducted by the Applicant, will be incidental to the Applicant's core business, which includes leasing and management of shopping centres owned by Stockland.

7. The address of the site at which you intent to sell energy, including a map of the site and brief description of this site and its current and future use/s.

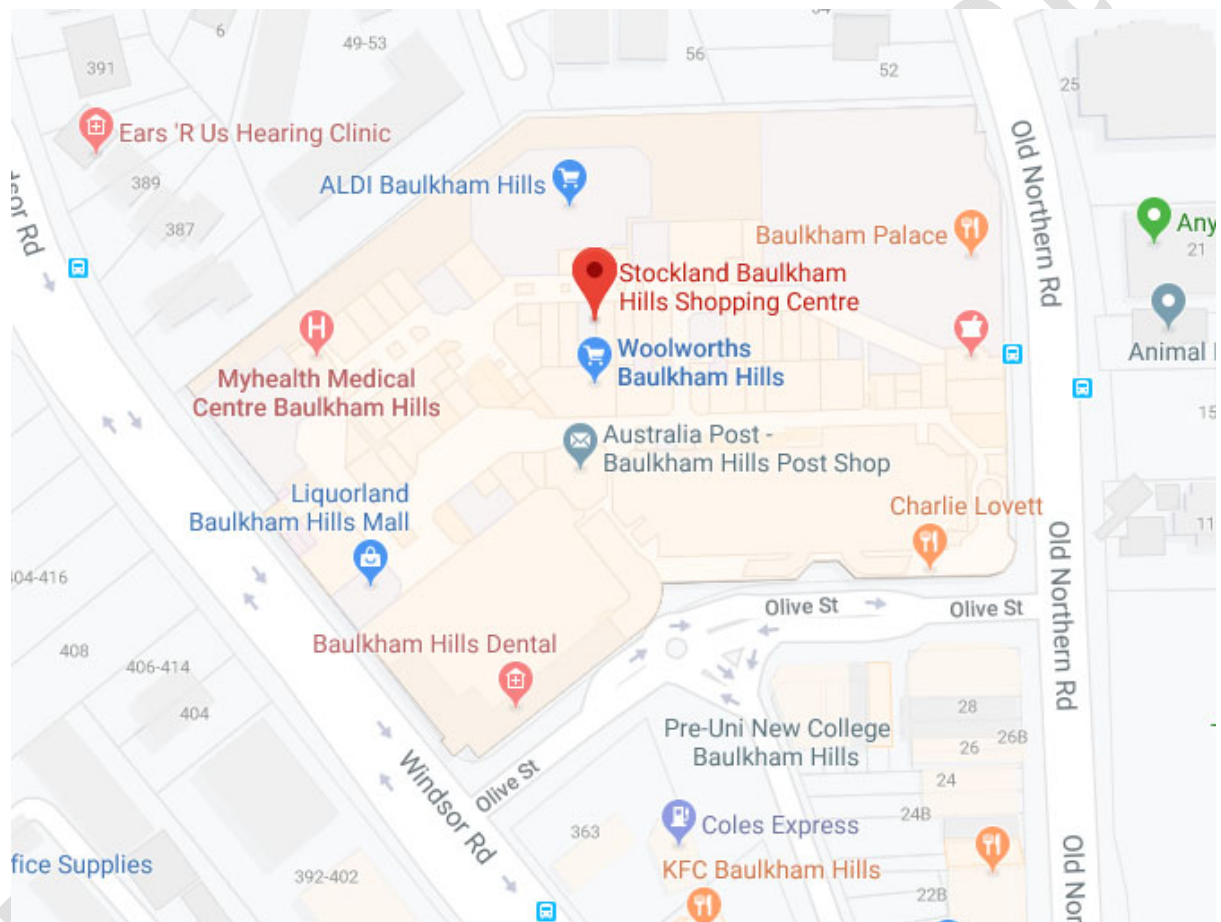

Stockland Baulkham Hills

375 – 383 Windsor Road, Baulkham Hills NSW 2153

Website: <https://www.stockland.com.au/shopping-centres/centres/stockland-baulkham-hills>

Stockland Baulkham Hills is a shopping centre and the Applicant intends to continue to operate this site as a shopping centre.

Stockland Baulkham Hills Map:

8. The primary activity of your business.

The Applicant's primary activity is operation/management of the Stockland owned and operated real estate assets.

9. The form of energy which you are seeking the individual exemption (electricity or gas). For electricity, please state whether the network you propose to sell is

directly or indirectly connected to the main grid or is (or will be) an off-grid network.

The form of energy to be sold is electricity and Stockland Baulkham Hills is connected to the local electricity distribution network.

10. Are you establishing, or have you established, energy supply in an area where there are no other viable energy supply arrangements available?

No

11. The date from which you intend to commence selling energy?

Approximately 1 May 2020, subject to the AER approval.

12. Mailing addresses for premises at the site (where applicable). We may use this information to ensure that potential customers are able to participate in our consultation process.

c/o Centre Management Office
Stockland Baulkham Hills
375 – 383 Windsor Rd, Baulkham Hills, NSW 2153

13. Details of any experience in selling energy, for example:

- a. Date's and location/s of previous operations
- b. Form/s of energy sold
- c. Scale of operations (that is, the number, size and type of customers)
- d. An explanation of which activities will be conducted in-house and which will be contracted out to third parties.

The Applicant has similar sites on the NEM where electricity is sold via embedded networks. Please refer to the table below for the details of these sites.

Site	State	Commencement	Tenants	MWh p/a	Type
Stockland Rockhampton	QLD	16/11/12	168	6,971	Shopping Centre
Stockland Gladstone	QLD	21/8/13	55	2,387	Shopping Centre
Stockland Hervey Bay	QLD	22/6/12	108	4,598	Shopping Centre
Stockland Caloundra	QLD	22/6/12	52	1,557	Shopping Centre
Stockland Benowa Gardens	QLD	22/6/12	33	1,369	Shopping Centre
Stockland Burleigh Heads	QLD	25/6/13	107	4,843	Shopping Centre

Stockland Merrylands	NSW	19/12/14	205	8,088	Shopping Centre
Stockland Shellharbour	NSW	19/12/14	233	11,271	Shopping Centre
Stockland Toowong	QLD	29/7/12	26	200	Office
Stockland Yennora	NSW	4/7/13	34	2,296	Distribution Centre

The proposed activities related to the key functions of the embedded network are as follows:

Service	Service performed by:	
	Stockland	Service Provider
Compliance	✓	✓
Consent campaign, sales and marketing to small and large		✓
Metering, bill generation and management of embedded network		✓
Client invoicing, debt management	✓	
Customer service, enquiries and complaint management	✓	✓
Embedded Network Manager (ENM)		✓

14. Whether you currently hold, or have previously held or been subject to, an energy selling exemption or a retail license (retailer authorisation) in any state or territory. If so, please provide details.

Yes. For relevant sites, embedded networks managed by the Applicant are subject to the applicable conditions of retail and network exemptions. The table of sites is provided in Question 13.

15. What arrangement you have made in the event that you can no longer continue supplying energy (e.g. has the retailer that sells to you agreed that they will service the customers)?

The embedded network will be designed so that in the unlikely event where the Applicant can no longer supply electricity to the tenants at Stockland Baulkham Hills, the tenants can enter into a separate Electricity Sale Agreement with an authorised retailer of choice.

Part 2: Particulars relating to the nature and scope of the proposed operations

16. Will your customers be your tenants? If so, are they residential or commercial/retail?

Yes, customers are tenants of Stockland Baulkham Hills shopping centre, and there will be no residential customers.

17. Are you providing other services (for example, accommodation/leasing of property) to persons on the site who you intend to sell energy to? Or will your only commercial relationship to persons on the site be the sale of energy? If you are providing other services, please specify what the services are, and the contractual or leasing arrangements under which these services are being provided.

Yes, property management services to tenants at Stockland Baulkham Hills the lease arrangement between the Applicant and the tenant. Where applicable, tenants will be subject to the *NSW Retail Leases Act 1995*.

18. What is the total number of dwellings/premises at the site? Please provide a breakdown between residential and business customers (and whether they are small or large as defined for the jurisdiction in which you intend to operate)?

No residential customers will be part of this Embedded Network.

Site	State	Small business tenant	Large -business tenant	Non-Embedded Network tenant
Stockland Baulkham Hills	NSW	76	6	0

19. Will you be on-selling energy (that is, selling energy purchased from an authorised retailer) or purchasing it directly from the wholesale market?

The Applicant will be on-selling electricity purchased from an authorised electricity retailer.

20. What is the estimated aggregate annual amount of energy you are likely to sell (kilowatt hours or megawatt hours for electricity and mega joules or giga joules for gas) and the average expected consumption of customers for each type of customer you service (that is, residential customers and retail or commercial customers)?

Estimated Total Consumption	Estimated Large Business Tenant Consumption	Estimated Small Business Tenant Consumption
-----------------------------	---	---

3,153 MWh	1,500 MWh	1,653 MWh
-----------	-----------	-----------

No residential customers will be part of this embedded network.

21. Will your customers be wholly contained within a site owned, controlled or operated by you? (For the purposes of this question, a body corporate may be taken to 'operate' premises it oversees).

Yes.

22. Will each premises/dwelling be separately metered? If the application is for a new development or a redevelopment and customers will not be separately metered, please explain why not.

Yes, all customers will be separately metered.

23. Will meters allow your customers to change retailers (i.e. not buy their energy from you) as required by the AER's Network Guideline?

Yes, all installed meters will be fit for purpose to allow full retail contestability as per AER's Network Guideline requirements and minimum services specification outlined in Chapter 7 of the National Electricity Rules.

24. In what form and how often will customers be billed? Will you be issuing bills yourself or through a billing agent?

The appointed embedded network service provider will create compliant electricity bills on a monthly basis, these bills will be invoiced by the Applicant.

25. What dispute resolution procedures do you intend to put in place to deal with energy related complaints and issues?

Dispute resolution procedures has been established consistent with AS/NZS 10002:2014. Please refer to the attached Stockland Customer Feedback and Complaints Procedure (Appendix L) for the details of the dispute resolution procedure.

26. Please provide any further information that you consider would assist us to assess your application.

During the past few months the Applicant has worked closely with the tenants at Stockland Baulkham Hills to ensure they understood the positives and negatives of the intended embedded network.

Supporting documentation to our application (please note that these documents are confidential as they include personal information and intellectual property, therefore should not be published in a public domain):

1. Appendix A – Sample of Letter of Intent (Confidential)
2. Appendix B – Sample of the Letter of Consent (Confidential)
3. Appendix C – Sample of Frequently Asked Questions (Confidential)
4. Appendix D – Sample of the Sale of Energy Terms and Conditions (Confidential)
5. Appendix E – Sample of Tariff Sheet (Confidential)
6. Appendix F – Sample of Dispute Process (Confidential)
7. Appendix G – Sample of Notice of Public Consultation (Confidential)
8. Appendix H – Consent Report (Confidential)
9. Appendix I – Tenant Communication Report (Confidential)
10. Appendix J – Correspondence received from LNSP (Confidential)
11. Appendix K – Copies of all Consent documentation (Confidential)
12. Appendix L – Stockland Customer Feedback and Complaints Procedure (Confidential)
13. Appendix M – EWON Fact Sheet (Confidential)

Provision of retrofit information

The Applicant provided the tenants of Stockland Baulkham Hills with the following information:

1. Written communication advising the tenants of our intent to establish an embedded network, “Letter of intent to establish an embedded network” (Annexure A);
2. In the written communication we explained that tenants still have access to their retailer of choice even though they are physically within an embedded network and it might be difficult to secure an energy only contract with an authorised retailer;
3. It was explained that a tenant could enter into an energy only contract with their retailer and that Stockland will recover their network charges;
4. The Applicant undertook to price match any real market offers available to tenants as per AER requirements;
5. The Applicant undertook to take all steps necessary to remedy any duplication of network charges experienced by child customers and that no connection fees would be charged to such customers;
6. Contact details of our service providers and relevant representatives;
7. A copy of our electricity sales term and conditions;
8. Tariffs and charges available to tenants who may elect to purchase their electricity from the embedded network;
9. FAQ page explaining questions that are often asked regarding embedded networks and consumers rights within the embedded network;
10. Over and above the information provided the Applicant and their representatives sent numerous emails, made telephone calls and attended face to face meetings to ensure all questions and concerns were addressed.

The difficulty in securing an authorised retailer contract was explained in detail on several occasions.

Collecting and recording explicit informed consent

The applicant provided their tenants with the information above before separately seeking tenant's explicit and informed consent to retrofit the site to an embedded network.

The Applicant kept the following records which will be made available to the AER upon request:

1. Copies of all information provided to tenants;
2. Records of all consultations and meetings held with tenants;
3. Register of all tenants who provided consent;
4. Register of all non-consenting tenants and their reasons for non-consenting; and
5. Records of any negotiation/dispute outcome.

All records will be kept for a period of no less than two years.

The Applicant are committed to continue engaging with non-consenting tenants to mitigate any concerns they may have.

The explicit consent was given on a document separate to the acceptance of an offer to purchase electricity from the Applicant.

Offer matching

The Applicant committed to match any real authorised retailer offers as per AER's core condition requirements.

Metering arrangements

The Applicant undertake to ensure that:

1. All tenants will be metered separately with metering that supports full retail contestability;
2. All metering installations will comply with the requirements of the National Measurement Act;
3. The metering will be installed and operated in line with AEMO's Metrology Procedure;
4. All technical standards will comply with the applicable jurisdictional laws;
5. All meters will be installed in a safe location with convenient access and there will be no cost to customers related to meter reading;
6. Access will be granted to retailers where, at their own cost, they wish to replace the meter with a meter of their own choosing.

The Applicant will bear all costs for any changes to metering and other alterations that take place in the course of retrofitting the exempt network.

All metering will allow exempt customers to access full retail contestability should they choose to use the Applicant's meters. Using the Applicant's meter to access retailer competition is not compulsory and a tenant and/or their retailer may choose to replace the meter at their cost.

Public Document

Part 3 : Converting embedded networks (retrofitting)

Provision of information

You must confirm you have evidence that consumers have been provided with the following information:

27. That you are planning to retrofit the site as an embedded network and this will require metering changes;

Yes

28. That consumers retain the right to contract with a retailer of choice even after inclusion in the embedded network (except where this right does not exist due to jurisdictional legislation);

Yes

29. That in order to exercise their right to a retailer of choice, consumers may need to enter into an 'energy only' contract, which is offered at retailers' discretion and may be difficult to obtain;

Yes, it was also explained that customers may find it difficult to access a retailer of choice as they often do not want to offer an energy only contract.

30. That customers in embedded networks may not receive the same protections as those of an authorised retailer under the Retail Law, including access to ombudsman schemes;

Yes, it was explained that their protections may differ from those of an authorised retailer.

31. Your electricity sales agreement, which details all fees and tariffs;

Yes, the tariff sheet included a tariff comparison against the best offers that were available in the market, the Applicant ranked number 1 for both bundled TOU and single rate tariffs.

(Appendix E).

32. The contact details of a representative from your company to answer any queries or concerns about the planned retrofit;

Yes.

Explicit informed consent

33. Confirm you have evidence of written consent from all customers affected by the retrofit;

Yes, please see Appendix H and K.

The Applicant received 87.80 % written consent from tenants affected by the proposed retrofit.

Total number of tenants – 82

Consenting tenants – 72

Non-consenting tenants – 8

Non-responding tenants - 2

34. Confirm that consent was sought separately from customers for the retrofit and the energy sale agreement

Yes, consent has been sought separately from the energy sales agreement.

35. If customers expressed concerns, provide evidence of your attempts to resolve them.

See Appendix I, the report provides the outcome of all correspondence and meetings that addressed concerns and the way to mitigate those concerns.

Retail contestability

To demonstrate you have addressed any potential customer detriment resulting from a loss of retail contestability, you must confirm whether you have:

36. Sought advice from the distributor about whether non-consenting customers can be wired out of the embedded network;

The Applicant along with their embedded network consultant sought advice from the local distributor regarding the possibility to wire non-consenting customers out of the embedded network. Endeavour Energy's preference is the 'all in or all out' approach, they do understand in certain centres some larger customers prefer to negotiate their own electricity accounts directly with the retailers and don't want to be involved in the embedded network in any way. In these cases, they will consider an embedded network for the customers that agree to be part of the embedded network, provided there is a clear electrical/physical separation between embedded and non-embedded network customers in terms of separate Point of Common Coupling (PCC) usually the LV switchgear in Endeavour substation, separate service mains and MSB/metering locations.

It is expected that the financial cost excluding some of the tenancies may be prohibitive to the viability of the Embedded Network, therefore all tenants will have the option to

remain with their retailer as an on-market child customer or accept an offer from the applicant that is not more expensive than their current retailer agreement.

37. Taken steps to ensure that customers who wish to remain with their retailer, but cannot be wired out, will not be financially disadvantaged by the retrofit. Measures to reduce financial detriment are likely to include price matching for affected customers, and taking financial responsibility for any double billing of network charges.

As per the requirements of the Retail Exempt Selling Guideline, we have mitigated this detriment by:

- The Applicant has notified all tenants via emails, phone calls and site visits to tenants at site; of a right to choose their own retailer, that they will receive two invoices if they choose not to purchase energy from the Applicant, and (for non-consenting tenants) that the Applicant will price match any genuine electricity offer that would be available to that grid connected customer.
- The Applicant will appoint an ENM to follow up with relevant market participants to request the AEMO Market Settlements and Transfer Solution (MSATS) is updated to reflect the embedded network installation minimising instances of double charging.
- Where a tenant has requested to remain with their authorised retailer, the Applicant will facilitate competition by allocating “child” NMIs to all tenants who choose to purchase energy from an authorised retailer. This allows tenants to remain with their existing authorised retailer under their current contract arrangement.
- Once the embedded network is installed, the Applicant will notify all authorised retailers to inform that either:
 1. the tenant has chosen to purchase energy from the Applicant, and request to cease billing from the date of embedded network install, or
 2. the tenant has chosen to continue to purchase energy from their authorised retailer, and to cease invoicing for network charges effective the date of embedded network install.
- Where a tenant notifies the Applicant of double charging, the Applicant’s agent will follow up with the relevant market participants to ensure this is rectified. This is predicated on the tenant providing a Letter of Authority to engage with their authorised retailer on their behalf.
- The Applicant commits to ongoing annual price reviews to ensure the rates on-sold are competitive to rates a tenant would otherwise receive from authorised retailers.

Customer dispute resolution services

38. Have you advised customers of your dispute resolution process and options for external dispute resolution, such as ombudsman schemes?

Yes, our “letter of intent” provided to all the tenants included our dispute resolution process that will apply for the embedded network at Stockland Baulkham Hills. To ensure tenants understand that they will not have the opportunity to seek a binding determination from EWON the applicant will:

- Whilst informing the tenants of the AER’s consultation period, include additional information relating EWON’s inability to provide a binding determination. Tenants will be provided the opportunity to change their consent status. Tenants will further be informed that Stockland will provide them with a free, independent and alternative dispute resolution service.
- As part of the sales campaign the EWON matter and access to an alternative independent and free dispute resolution service will again be documented as part of the sales process.

A full copy of Stockland’s Customer Feedback and Complaints Procedure will be provided to customers at the time of sign-up (Appendix L). As advised to the AER in March 2019, Energy and Water Ombudsman NSW (EWON) is unable to accept membership from Stockland for commercial customers.

AER Consultation

39. You must confirm you have advised consumers of the AER’s consultation process. In particular, you must make consumers aware that the AER consults on individual exemption applications and will publish your application on its website and invite public submissions.

The Applicant undertook to inform tenants in writing of the AER’s consultation process once the consultation dates are made known and/or when the exemption application is published on the AER’s websites. A copy of the letter is provided as Appendix G.

Further to informing the tenants of the AER’s consultation process, the applicant undertakes to provide tenants with additional information about access to a free external dispute resolution service (Appendix M). Tenants will be provided the opportunity to withdraw their consent.
