Determination - SA Power Networks Regulatory Proposal (2015 – 2020)

As one of the largest energy users in the Riverland and as a member of the Riverland Energy Association I would like to express our support for the AER's determination on the SA Power Networks Regulatory Proposal 2015-2020.

Our business as with many others has been under increasing financial pressure, and rising network charges have been a significant contributor to these increasing costs. While we recognize the reliability and service SA Power Networks have provided we firmly believe the cost increases we have incurred over the past number of years have been unfair and unrealistic.

We believe the the AER's determination on the SA Power Networks Regulatory Proposal 2015-2020 will allow SA Power Networks to achieve fair and reasonable financial outcomes and maintain it quality of service.

Regards

Trevor Davidson
General Manager
