Weekly Gas Market Report

21 October – 27 October 2012

Weekly summary

This week, prices in all markets except for Brisbane were below average prices for the financial year to date.

AUSTRALIAN ENERGY

REGULATOR

Long term statistics and explanatory material

The AER has published an <u>explanatory note</u> to assist with interpreting the data presented in its weekly gas market reports. The AER also publish a range of <u>longer term statistics</u> on the performance of the gas sector including gas prices, production, pipeline flows and consumer demand.

Market overview

Figure 1 sets out the average daily prices (\$/GJ) in the Victorian Declared Wholesale Market (VGM or Victorian gas market) and for the Sydney (SYD), Adelaide (ADL) and Brisbane (BRI) Short Term Trading Market hubs (STTM) for the current week compared to historical averages.

	Victoria	Sydney	Adelaide	Brisbane
21 Oct - 27 Oct 2012	4.01	5.62	4.38	5.66
% change from previous week	-9	6	-9	2
12-13 financial YTD	4.86	6.01	5.62	5.35
% change from previous financial YTD	56	79	49	-

Figure 1: Average daily prices – all markets (\$/GJ)¹

Figure 2 compares average weekly gas prices, ancillary market payments and scheduled injections against historical averages for the Vic gas market.

Figure 2: Victorian gas market

	Price (\$/GJ)	Ancillary payments (\$000)	BOD forecast demand quantity (TJ)
21 Oct - 27 Oct 2012	4.01	-	523
% change from previous week	-9	-	18
12-13 financial YTD	4.86	-	771
% change from previous financial YTD	56	-	3

*Note: From February 18, only positive ancillary payments, reflecting system constraints will be shown here

More detailed analysis on the Victorian declared wholesale market is provided in Section 1.

Figures 3 to 5 show average ex ante and ex post gas prices, MOS balancing gas service payments together with the related daily demand quantities against historical averages for the Sydney, Adelaide and Brisbane wholesale gas markets, respectively.

The weighted average daily imbalance price applies for Victoria.

Figure 3: Sydney STTM

	Ex ante price (\$/GJ)	Ex post price (\$/GJ)	MOS payments (\$000)	Ex ante quantity (TJ)	Ex post quantity (TJ)
21 Oct - 27 Oct 2012	5.62	5.40	8.43	220	217
% change from previous week	6	-4	13	7	5
12-13 financial YTD	6.01	6.59	11.20	270	271
% change from previous financial YTD	79	124	-78	3	6

Figure 4: Adelaide STTM

	Ex ante price (\$/GJ)	Ex post price (\$/GJ)	MOS payments (\$000)	Ex ante quantity (TJ)	Ex post quantity (TJ)
21 Oct - 27 Oct 2012	4.38	3.89	14.91	65	59
% change from previous week	-9	-12	-51	-3	-1
12-13 financial YTD	5.62	5.55	8.39	85	82
% change from previous financial YTD	49	50	-19	8	6

Figure 5: Brisbane STTM

	Ex ante price (\$/GJ)	Ex post price (\$/GJ)	MOS payments (\$000)	Ex ante quantity (TJ)	Ex post quantity (TJ)
21 Oct - 27 Oct 2012	5.66	5.74	1.80	157	158
% change from previous week	2	6	58	0	0
From market start (1 Dec)	5.35	5.16	3.08	139	137

More detailed analysis of the STTM hubs is found in sections 2 to 4.

Section 5 provides analysis on production and pipeline flows on the National Gas Bulletin Board, as well as gas-powered generation volumes in each state.

Significant Market Events or Issues this week

This week in the Victorian market there were a number of days of gas flow constraints on at Longford. Figure 1.5 shows that from late in the 25 October gas day until the end of the reporting period Iona had a significant share of supply to the hub.

Bass Gas had some visible issues on 25 October before going back offline on 26 October.

In Adelaide, on gas days when relatively small amounts of gas were scheduled and allocated on the MAP, the majority of balancing gas services (MOS) were provided by the SEA Gas pipeline. Conversely, when MAP supplied more gas to the market, it supplied the majority of MOS.

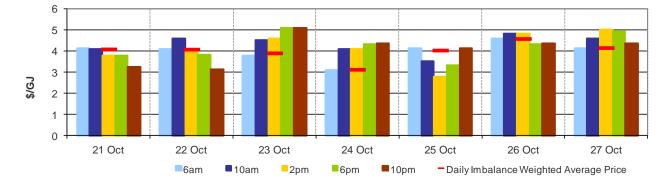

Detailed Market Analysis

21 October – 27 October 2012

1 Victorian Declared Wholesale Market

In the Victorian Gas Market gas is priced five times daily at 6 am, 10 am, 2 pm, 6 pm and 10 pm. However, the volume weighted gas price on a gas day tends towards the 6 am price which is the schedule at which most gas is traded.

The main drivers of price are demand forecasts together with bids to inject or withdraw gas from the market. For each of the five gas day pricing schedules, figures 1.1 to 1.4 below show the daily prices, demand forecasts², and injection/withdrawal bids³. Figure 1.5 provides information on which system injection points were used to deliver gas, in turn indicating the location and relative quantity of gas bids cleared through the market. Gas is priced five times daily (at 6 am, 10 am, 2 pm, 6 pm and 10 pm) when the first schedule and four reschedules apply, while the last 8-hour schedule has been separated into two 4-hour blocks for a consistent comparison with other scheduled injection volumes. The main drivers of price are demand forecasts and gas bids.⁴

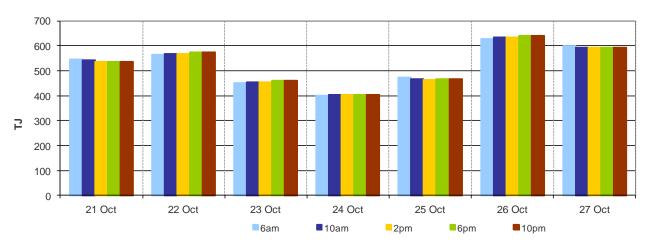

Figure 1.2: Demand forecasts

² These are Market Participants' aggregate demand forecasts adjusted for any override as applied by AEMO from time to time. The main driver of the amount of gas scheduled on a gas day are these forecasts which are forecasts that cannot respond to price or in other words is gas delivered regardless of the price.

³ The price might also be affected by transmission or production (contractual) constraints limiting how much gas can be delivered from a locale or System Injection Point (SIP) from time to time.

⁴ The price might also be affected by transmission or production (contractual) constraints limiting how much gas can be delivered from a locale or SIP from time to time.

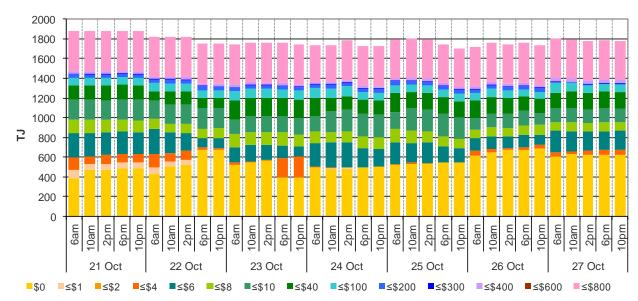

Figure 1.3: Injection bids by price bands

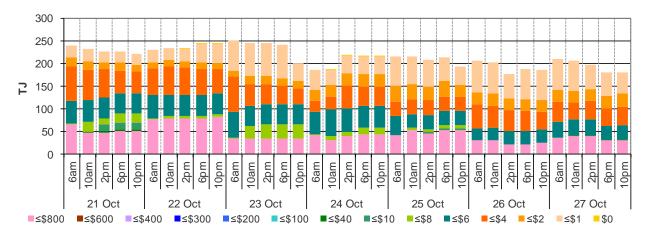

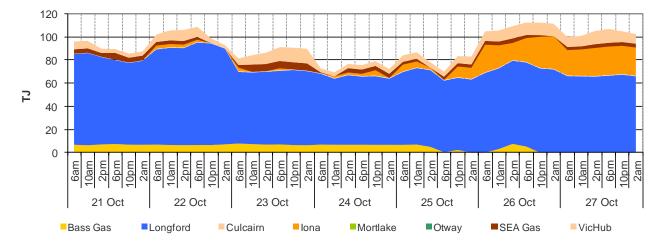

Figure 1.5: Metered Injections by System Injection Point

2 Sydney STTM

In each STTM hub, gas is priced once before each gas day (the ex ante price) and once after the gas day (the ex post price). The main drivers of ex ante and ex post prices are demand forecasts, together with participant offers and offers to inject or bids to withdraw gas traded through the hub.⁵ Prices before and after the gas day may also vary depending on how much gas is scheduled before the gas day (setting the ex ante price) and how much gas is consumed in the hub on a gas day (setting the ex post price).

Market Operator Service balancing gas (MOS) payments arise because the amount of gas nominated on pipelines for delivery on a gas day will either exceed or fall short, by some amount, of the amount of gas consumed in the hub. In such circumstances, MOS payments are made to participants for providing a service to park gas on a pipeline or to loan gas from a pipeline to the hub.⁶

Figures 2.1 and 2.2 show daily prices, demand, offers and bids. Figures 2.3 and 2.4 show gas scheduled and allocated on pipelines, indicating the location and relative quantity of gas offers across pipelines and also the amount of MOS allocated for each pipeline.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Ex ante price (\$/GJ)	4.91	6.87	8.12	4.91	5.01	5.01	4.50
Ex ante quantity (TJ)	158	238	251	255	221	215	203
Ex post price (\$/GJ)	6.00	6.87	6.87	4.81	4.59	4.81	3.82
Ex Post quantity (TJ)	172	240	246	234	213	211	200

Figure 2.1: SYD STTM daily ex ante and ex post prices and quantities

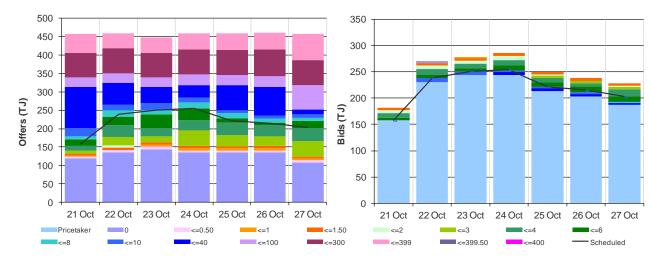

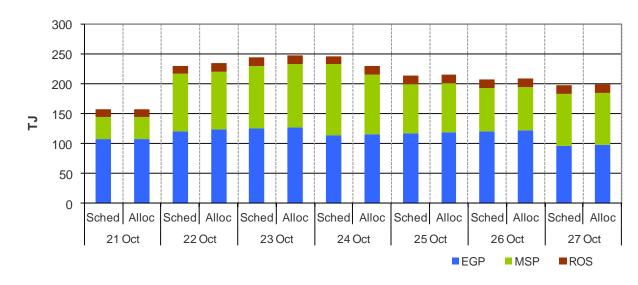

Figure 2.2 (a) Daily hub offers in price bands (\$/GJ) Figure 2.2(b): Daily hub bids in price bands (\$/GJ)

⁵ The main driver of the amount of gas scheduled on a gas day is the 'price-taker' bid, which is forecast hub demand that cannot respond to price and which must be delivered, regardless of the price.

⁶ MOS payments involve a payment for a MOS decrease service when the quantity delivered exceeds actual final gas nominations and a MOS increase applies otherwise. As well as a MOS service payment, as shown in figure 2.4 MOS providers are paid for or pay for the quantity of MOS sold into the market or bought from the market.

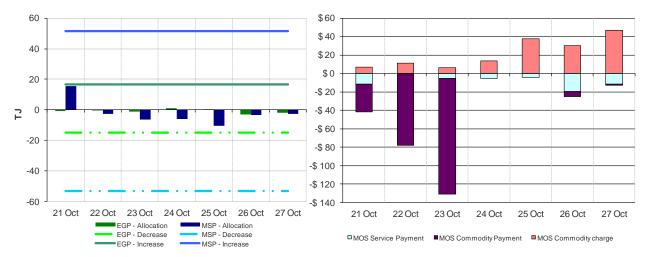

Figure 2.4 (b): Service payments and commodity payments/charges (\$000)

3 Adelaide STTM

The Adelaide STTM hub functions in the same way as the Sydney STTM hub. The same data that was presented for the Sydney hub is presented for the Adelaide hub in the figures below.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Ex ante price (\$/GJ)	4.23	4.23	4.36	4.61	4.36	4.50	4.35
Ex ante quantity (TJ)	55	70	65	65	73	73	56
Ex post price (\$/GJ)	3.80	3.91	3.91	3.81	3.94	3.91	3.94
Ex Post quantity (TJ)	46	67	60	59	67	64	47

4 Brisbane STTM

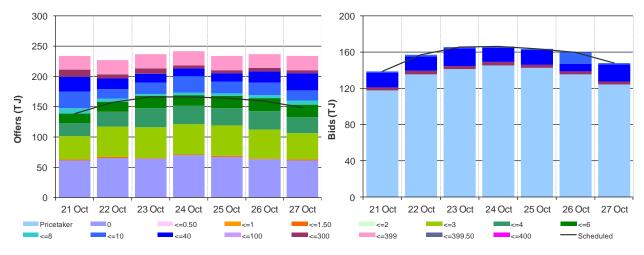

The Brisbane STTM hub functions in the same way as the Sydney STTM hub. The same data that was presented for the Sydney hub is presented for the Brisbane hub in the figures below.

Figure 4.1:	BRI STTM daily ex ante and ex post prices and quantities									
	Sun	Mon	Tue	Wed	Thu	Fri				

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Ex ante price (\$/GJ)	5.98	5.98	5.98	5.93	4.90	4.90	5.98
Ex ante quantity (TJ)	139	157	166	167	164	160	148
Ex post price (\$/GJ)	5.98	6.07	6.07	4.17	5.93	5.98	5.98
Ex Post quantity (TJ)	137	159	170	162	165	163	151

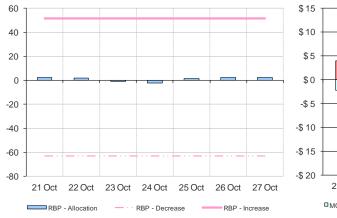

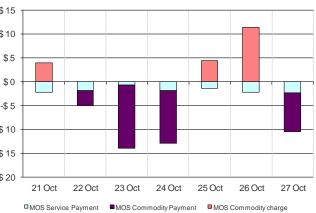

F

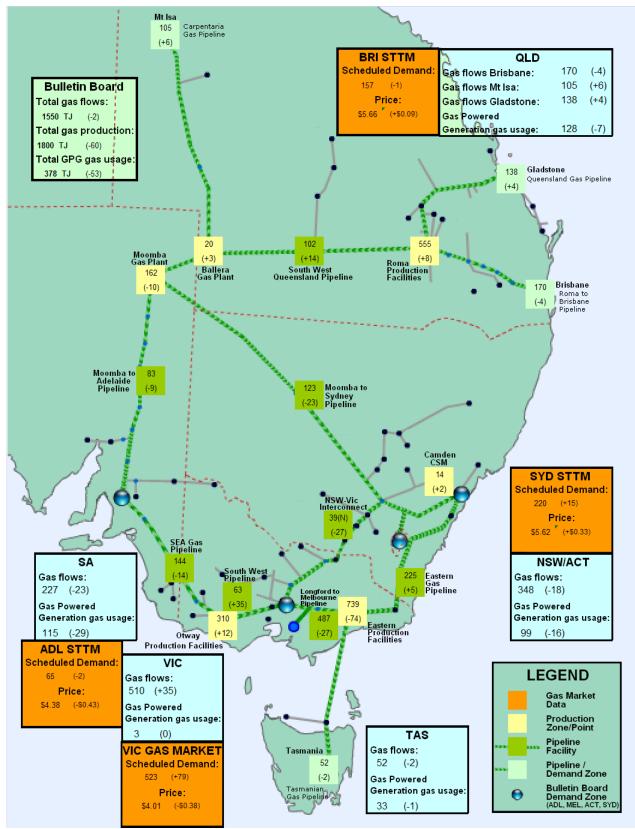

5 National Gas Bulletin Board

Figure 5.1 shows average daily actual flows for the current week in the aqua boxes⁷ from the Bulletin Board (changes from the previous week's average are shown in brackets). Gas-powered generation (GPG) gas usage is also shown in each region in the aqua boxes. In the orange boxes average daily scheduled volumes and prices for each gas market are provided.

⁷ Regional Gas Flows: **SA** = MAP + SEAGAS, **VIC** = SWP + LMP – negative(NSW-VIC), **NSW/ACT** = EGP + MSP, **TAS** = TGP, **QLD** (**Brisbane**) = RBP, **QLD** (**Mt Isa**) = CGP, **QLD** (**Gladstone**) = QGP
